Freud's Mistress - Karen Mack 2014-06-03

"A thrilling story of seduction, betrayal, and loss, Freud's Mistress will titillate fans of *Memoirs of a Geisha* and *The Other Boleyn Girl*."—Booklist In fin-de-siècle Vienna, it was not easy for a woman to find fulfillment both intellectually and sexually. But many believe that Minna Bernays was able to find both with one man—her brother-in-law, Sigmund Freud. At once a portrait of two sisters—the rebellious, independent Minna and her inhibited sister, Martha—and of the compelling and controversial doctor who would be revered as one of the twentieth century's greatest thinkers, *Freud's Mistress* is a novel rich with passion and historical detail and "a portrait of forbidden desire [with] a thought-provoking central question: How far are you willing to go to be happy?"* *Publishers Weekly

The Ski Mask Way - 50 Cent 2007-01-09

Diesel Engine Management - Konrad Reif 2014-07-18

This reference book provides a comprehensive insight into today's diesel injection systems and electronic control. It focusses on minimizing emissions and exhaust-gas treatment. Innovations by Bosch in the field of diesel-injection technology have made a significant contribution to the diesel boom. Calls for lower fuel consumption, reduced exhaust-gas emissions and quiet engines are making greater demands on the engine and fuel-injection systems.

Sensors and Transducers - Ian Sinclair 2000-12-05

In this book Ian Sinclair provides the practical knowhow required by technician engineers, systems designers and students. The focus is firmly on understanding the technologies and their different applications, not a mathematical approach. The result is a highly readable text which provides a unique introduction to the selection and application of sensors, transducers and switches, and a grounding in the practicalities of designing with these devices. The devices covered encompass heat, light and motion, environmental sensing, sensing in industrial control, and signal-carrying and non-signal switches. Get up to speed in this key topic through this leading practical guide Understand the range of technologies and applications before specifying Gain a working knowledge with a minimum of maths

II Latin American Conference on Bioimpedance - Franco Simini 2015-09-26

This volume presents the proceedings of CLABIO 2015 - II Latin American Conference on Bioimpedance, held in Montevideo, Uruguay - September 30 - October 02, 2015. The works cover a broad range in Biomedical Engineering and Computing, Medical Physics and Medical Sciences, Environment, Biology and Chemistry. The topics are:

·Bioimpedance Applications ·Bioimpedance Instrumentation ·Body and Tissue Composition ·Cell Culture and Cell Suspension ·Electrical Impedance Tomography ·Electrode Modelling ·Magnetic Induction - Electrical Impedance Tomography ·Magnetic Resonance - Electrical Impedance Tomography ·Nonlinear Phenomena ·Organ and Tissue Impedance ·Plant Tissue Impedance ·Skin Impedance Modelling ·Technological Advances in Bioimpedance ·Theory and Modelling

A for Anything - Damon Knight 2020-12-04

What would happen if someone invented a machine that could create an exact duplicate of anything? That is the simple but remarkable premise of Damon Knight's classic 1959 novel, *A for Anything*. "The Gismo," as the machine is known, seems like it will end poverty and need forever. But of course, things are not that simple. Like any truly great work of science fiction, Knight's novel boldly pursues the ramifications of his premise. What will people do if there is no longer any need to work for anything? What happens if this device is spread carelessly throughout the world (it can even duplicate itself!). Finally, there is the supreme and most chilling of questions: what happens if you try to duplicate a human being? *A for Anything* is a classic work of science fiction, but it considers questions that are as relevant and compelling today as they were fifty years ago, perhaps more so. Like most of us, Knight watches the mind-boggling technological advancements of our time with a mixture of awe and alarm, and wonders whether we are really in control of the things we are creating. Knight has put his finger on the pulse of our modern sensibility and, mixed with his truly remarkable imagination, created a novel that is gripping, thought-provoking and impossible to put down.

The Poetry of T. S. Eliot - D. E. S. Maxwell 2015-12-22

In this fascinating and revealing book, first published in 1952, Maxwell shows the development of Eliot's poetry and poetic thought in the light of his political and religious attachments. This study traces Eliot's style from the earliest poems to the Quartets, and examines the characteristics of Eliot's earlier work adumbrate that of his maturity. The Poetry of T. S. Eliot is essential reading for students of literature.

Cherokee Cooklore: Preparing Cherokee Foods (Reprint Edition) - Mary Ulmer 2014-07-28

First published in 1951, *Cherokee Cooklore* introduces us to traditional Cherokee cooking. It starts with a photographic essay as Aggie Lossiah demonstrates how she makes bean bread. This is followed by recipes gathered from the North Carolina Cherokee community (including yellowjacket soup, blood pudding, hominy corn drink, baked squirrel, and hickory nut soup). A description of Cherokee food customs follows. This is a fascinating booklet that provides valuable food lore for the adventuresome gourmet or the student of Native American history. *Hannah Arendt and the Search for a New Political Philosophy* - B.C. Parekh 1981-06-18

Internal Combustion Engines - Institution of Mechanical Engineers 2014-10-10

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

Scattering Theory - Harald Friedrich 2015-11-20

This corrected and updated second edition of "Scattering Theory" presents a concise and modern coverage of the subject. In the present treatment, special attention is given to the role played by the long-range behaviour of the projectile-target interaction, and a theory is developed, which is well suited to describe near-threshold bound and continuum states in realistic binary systems such as diatomic molecules or molecular ions. It is motivated by the fact that experimental advances have shifted and broadened the scope of applications where concepts from scattering theory are used, e.g. to the field of ultracold atoms and molecules, which has been experiencing enormous growth in recent years, largely triggered by the successful realization of Bose-Einstein condensates of dilute atomic gases in 1995. The book contains sections on special topics such as near-threshold quantization, quantum reflection, Feshbach resonances and the quantum description of scattering in two dimensions. The level of abstraction is kept as low as at all possible and deeper questions related to the mathematical foundations of scattering theory are passed by. It should be understandable for anyone with a basic knowledge of nonrelativistic quantum mechanics. The book is intended for advanced students and researchers, and it is hoped that it will be useful for theorists and experimentalists alike.

Magnetic Nanostructures - Hartmut Zabel 2012-09-15

Nanomagnetism and spintronics is a rapidly expanding and increasingly important field of research with many applications already on the market and many more to be expected in the near future. This field started in the mid-1980s with the discovery of the GMR effect, recently awarded with the Nobel prize to Albert Fert and Peter Grünberg. The present volume covers the most important and most timely aspects of magnetic heterostructures, including spin torque effects, spin injection, spin transport, spin fluctuations, proximity effects, and electrical control of spin valves. The chapters are written by internationally recognized experts in their respective fields and provide an overview of the latest status.

Supersize Mad Libs - Mad Libs 2017-06-27

Mad Libs is the world's greatest word game and the perfect gift or activity for anyone who likes to laugh! Write in the missing words on each page to create your own hilariously funny stories in this Supersize Mad Libs! Wow, I didn't know my dog could VERB! With 105 "fill-in-the-blank" stories about cat ladies, mermaids, and gaming, there's something for everyone. Play alone, in a group, or in detention! Mad Libs are a fun family activity recommended for ages 8 to NUMBER. Supersize Mad Libs includes: - Five complete Mad Libs books in one collection: Unicorns, Mermaids, and Mad Libs; Dog Ate My Mad Libs; Meow Libs; Game Over! Mad Libs; Escape from Detention Mad Libs - Silly stories: 105 "fill-in-the-blank" stories all about Easter fun! - Language arts practice: Mad Libs are a great way to build reading comprehension and grammar skills. - Fun With Friends: each story is a chance for friends to work together to create unique stories!

Spark Family Fun - Chronicle Books 2019-03-05

These fun faux matchsticks are printed with prompts and talking points that will get loved ones laughing, connecting, and playing together. A perfect way to liven up family gatherings and road trips, this colorful box of joy makes an extra-sweet gift for Mother's Day or Father's Day.

The Silent War - Andreas Norman 2019-09-05

As the head of Swedish Intelligence in Brussels Bente Jensen has many enemies, even among those who ought to be her allies, like Jonathan Green of MI6. In a city heaving with competing espionage agencies he is the person she fears and distrusts most. She has good reason. They share a past. Green has been part of an MI6 conspiracy to hold, interrogate, torture and kill its political prisoners in a safe house in Syria. This explosive information has been leaked to Bente by a conscience-stricken British operative. When it is clear she can expose this operation MI6 uses its full arsenal of dirty tricks to shame her, disgrace her, destroy her relationships and remove her from active service. But Green's private life has more in common with Bente's than he acknowledges. He is far from fireproof himself. Both spies will find themselves targets of the UK establishment's precisely calculated revenge. Like its highly acclaimed predecessor *Into A Raging Blaze* Andreas Norman's new novel is a morally and politically complex international thriller. Its nail-biting plot and sympathetic characters show the tragic human consequences of private and public treachery.

Start Your Own Import/Export Business - The Staff of Entrepreneur

Media 2021-03-09

Start a Business—We'll Show You How. Entrepreneur magazine's Startup series presents everything you need to know about starting and running more than 55 of today's hottest businesses. As a successful import/export agent, you can net a healthy six-figure income by matching buyers and sellers from around the globe, right from your own home. This book is loaded with valuable insights and practical advice for tapping into highly lucrative global markets. You'll learn every aspect of the startup process, including: Choosing the most profitable goods to buy and sell Setting up and maintaining a trade route Using the internet to simplify your transactions How the government can help you find products and customers Essential trade law information to keep your business in compliance How to choose a customs broker The latest government policies Proven methods for finding contacts in the United States and abroad Plus, you'll gain the tricks of the trade from successful importers/exporters and hundreds of valuable resources help you become a player in the lucrative world of international exchange.

308 Circuits - Jan Buiting 2003

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

4x4 Suspension Handbook - Trenton McGee 2008-02-01

Author Trenton McGee, 4x4 suspension expert and host of Outdoor Channels Off-Road Adventures, explains 4x4 suspension systems in an easy-to-understand manner. He gets specific on types of suspensions available from all the major manufacturers including Jeep, Toyota, Ford, Chevy, and Dodge. He goes into a great level of detail on every different model, including early and modern model systems.

Surviving Home - A. American 2016-04-05

Book 2 of The Survivalist Series No electricity. No running water. No food. No end in sight. If life as you knew it changed in an instant, would you be prepared? In A. American's first novel, Going Home, readers were introduced to Morgan Carter, the resourceful, tough-as-nails survivalist who embarks on a treacherous 250-mile journey across Florida following the collapse of the nation's power grid. Now reunited with his loving wife and daughters in this follow-up to Going Home, Morgan knows that their happiness is fleeting, as the worst is yet to come. Though for years Morgan has been diligently preparing for emergency situations, many of his neighbors are completely unready for life in this strange new world--and they're starting to get restless. With the help of his closest companions, Morgan fights to keep his home secure--only to discover shocking information about the state of the nation in the process. Fans of James Wesley Rawles, William R. Forstchen's One Second After, and The End by G. Michael Hopf will revel in A. American's apocalyptic tale.

Althusser and Law - Laurent de Sutter 2013-03-05

Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological State Apparatuses', law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.
