Physical Optics - Giovanni Giusfredi 2019-11-12

This textbook provides a sound foundation in physical optics by covering key concepts in a rigorous but accessible manner. Propagation of electromagnetic waves is examined from multiple perspectives, with explanation of which viewpoints and methods are best suited to different situations. After an introduction to the theory of electromagnetism, reflection, refraction, and dispersion,

topics such as geometrical optics, interference, diffraction, coherence, laser beams, polarization, crystallography, and anisotropy are closely examined. Optical elements, including lenses, mirrors, prisms, classical and Fabry-Perot interferometers, resonant cavities, multilayer dielectric structures, interference and spatial filters, diffraction gratings, polarizers, and birefringent plates, are treated in depth. The coverage also encompasses such seldom-covered topics as modeling of general astigmatism via 4×4 matrices, FFT-based numerical methods, and bianisotropy, with a relativistic treatment of optical activity and the Faraday and Fresnel-Fizeau effects. Finally, the history of optics is discussed.

Anaximander - Carlo Rovelli 2023-02-23
Over two millennia ago, a Greek philosopher had a number of wondrous insights that paved the way to cosmology, physics, geography, meteorology and biology, setting in motion a new way of seeing the world. Anaximander's legacy includes the revolutionary idea that the earth floats in a void, that the

world can be understood in natural rather than supernatural terms, that animals evolved, and that universal laws govern all phenomena. He introduced a new mode of rational thinking with an openness to uncertainty and to the progress of knowledge. In this elegant work, acclaimed physicist Carlo Rovelli brings to light the importance of Anaximander's overlooked legacy to modern science. He examines Anaximander as a scientist interested in shedding light on the deep nature of scientific thinking, which Rovelli locates in his rebellious ability to reimagine the world again and again. Anaximander celebrates the radical lack of certainty that defines the scientific quest for knowledge.

The Call Of Ice - Simone Moro
2014-09-19

* Adventure memoir from a renowned winter climber at the top of his game * Moro reflects on some of his most significant climbs * A bestseller in Italy, this is the first English-language edition of Moro's story Simone Moro is a celebrated Italian alpinist who specializes in winter climbing: He holds the record for first winter ascents of 8000-meter peaks—Shisha Pangma, Makalu, and Gasherbrum II. A passionate climber, he is also an accomplished helicopter pilot and founder of a helicopter rescue program in Nepal. *The Call of the Ice* was written during Moro's dramatic winter attempt on Nanga Parbat in 2012—his twelfth attempt on that mountain—during weather delays and other breaks in the climb. Moro reflects on past climbs and partners, including the death of his longtime friend and climbing partner, Anatoli Boukreev, on Annapurna, his mourning when Boukreev died, and his subsequent recovery;

Denis Urubko and the nature of climbing partnerships; two attempts on Shisha Pangma; Broad Peak; Makalu; and Gasherbrum II, which he, Urubko, and Cory Richards completed in February 2011 despite near-tragic moments when they miraculously escaped after being swept away by an avalanche. Many of Moro's climbs do not result in a summit and he explains why his interest lies in the attempt itself. In addition to these reflections, we relive in real-time his attempt on Nanga Parbat, which he and Urubko had to abandon after 51 days and 6600 meters! "I will go in winter. Again. Yes in winter. Just because it's my dream. Just because exploration never ends." - Simone Moro

Everybody Wants to Go to Heaven but Nobody Wants to Die: Bioethics and the Transformation of Health Care in America - Amy Gutmann

2019-08-27

NOW FEATURING A NEW AFTERWORD, "PANDEMIC ETHICS" From two eminent scholars comes a provocative

examination of bioethics and our culture's obsession with having it all without paying the price. Shockingly, the United States has among the lowest life expectancies and highest infant mortality rates of any high-income nation, yet, as Amy Gutmann and Jonathan D. Moreno show, we spend twice as much per capita on medical care without insuring everyone. A "remarkable, highly readable journey" (Judy Woodruff) sure to become a classic on bioethics, *Everybody Wants to Go to Heaven but Nobody Wants to Die* explores the troubling contradictions between expanding medical research and neglecting human rights, from testing anthrax vaccines on children to using brain science for marketing campaigns. Providing "a clear and compassionate presentation" (Library Journal) of such complex topics as radical changes in doctor-patient relations, legal controversies over in vitro babies, experiments on humans, unaffordable new drugs, and limited access to

hospice care, this urgent and incisive history is "required reading for anyone with a heartbeat" (Andrea Mitchell). *Fun for Movers Teacher's Book* - Anne Robinson 2010-03-04 *Fun for Movers* Second edition is a book of lively preparation material for students taking the Cambridge Young Learners Movers test. Primary Teachers Talking - Professor Jennifer Nias 2002-06-01

What is it like to be a primary teacher? The first detailed study of the personal and professional experience of primary teachers in England

and Wales, Primary Teachers Talking makes extensive use of verbatim evidence supplied by teachers during interviews in their first decade of work and again ten years later. In Part I Jennifer Nias discusses the importance attached to the ways in which primary teachers see themselves and the main dimensions of that self-image. In Part II, she examines the subjective experience of 'being a primary teacher', looking at the main factors which contribute to job satisfaction and dissatisfaction, and at teachers' relationships with their colleagues. She shows that to 'feel like a teacher' is to learn to live with dilemma, contradiction and paradox and - at its best - to experience in their resolution the creative satisfactions of the artist.
