**Emotional Balance** - Roy Martina 2010-10-04

Dr Roy Martina has developed a powerful comprehensive healing system called 'Omega healing'. This preventative system has been acknowledged as one of the most powerful healing techniques currently available. It tackles the root cause of problems - not just the symptoms. Balancing the emotional body and returning to our core essence restores us to greater health, ease and happiness. This fantastic CD package collects together some of Roy's most powerful teachings on this subject, along with meditations that will allow you to implement its incredible effects in your life. The first section provides an excellent introduction to Roy's background and how he came to heal himself using his Omega Healing technique. The second section features four incredible meditations that will allow you to heal every aspect of your life. The first provides energy and vitality. The second is a relaxing visualisation for the end of the day. The third helps with releasing feelings. The fourth helps heal traumas in our past lives. These meditations, recorded live in London and exclusively for Hay House showcase one of the brightest new voices in healing.

**In Praise of Forgiveness** - Massimo Recalcati 2020-05-19

Relationships fall apart, marriages fail, couples break up - it happens to us all. Time corrodes passion and the routines of daily life kill the excitement that surrounds the emotion of the first encounter. The difficulty

of uniting sexual pleasure with love, which Freud considered to be the most common neurosis in any love life, has become emblematic of a truth that seems undeniable: desire is destined to die if its object is not constantly renewed, if we do not change partner, if it is closed for too long in the restrictive chamber of the same bond. And yet what happens to these bonds when one of the two partners betrays the other, when the promise fails, when there is another emotional experience cloaked in secrecy and deceit? What happens if the traitor then begs forgiveness? Are they asking to be loved again and, having declared that it is not like it used to be, now want everything to go back to how it was? Should we make fun of lovers in their attempts to make love last? Or should we try to face up to the experience of betrayal, with the offence caused by the person we love most? Should we not perhaps attempt to praise forgiveness in love?

**Ti amo perché tengo a me** - Massimo Bartoletti 2019-04-05

Con uno stile chiaro e narrativo, l'autore parte dal definire la differenza tra innamoramento e amore fino ad arrivare a descrivere come due persone possano costruire relazioni durature, trasformando le difficoltà in opportunità di crescita per la coppia. Delinea come l'amare qualcuno possa divenire una forte motivazione a migliorare se stessi, completando la propria individualità con quegli aspetti di noi che possiamo scoprire solo nel rapporto con l'altro. Dimostra quanto l'attenzione verso l'altro e il tempo che siamo disponibili a dedicare al rapporto giochino un ruolo fondamentale nelle relazioni affettive. Affronta le diverse difficoltà di coppia attraverso il racconto di storie reali, riservando un capitolo specifico alla dipendenza affettiva. Approfondisce gli effetti psicologici della fine di una storia importante e le implicazioni di quando avviene in coppie con figli, presentando, in appendice, una guida su come comunicare ai figli l'intenzione dei genitori di separarsi. Sfata i principali luoghi comuni sull'amore e sottolinea l'importanza di superare le proprie insicurezze che, come una stretta armatura, imprigionano la nostra voglia di amare.

**Medicine Upside Down** - Giorgio Mambretti 2013-03-01

Dr Hamer is a highly controversial figure: his patients love him, yet other doctors want to block him, and meanwhile he gathers acknowledgements, but at the same time he is put on trial as well. Many believe that most of the opposition against him is because his theories -- and above all his long list of patients who have been healed -- go completely against established medicine... How can it be that diseases like cancer can simply be an attempt of the brain to fix (which means to heal) some emotional traumas? And that identifying such traumas and solving them can equate to healing the body? This is the only book available in Italy which is really up-to-date and comprehensive, very clear and supported by some brilliant cartoons: all these qualities have turned it into a real best seller. At long last a book on Dr Hamer's new Germanic Medicine that is both really easy-to-read and comprehensive. Approach these controversial, yet fascinating theories with objectivity and open-mindedness.

*Asylums* - Erving Goffman 2017-09-08

A total institution is defined by Goffman as a place of residence and work where a large number of like-situated, individuals, cut off from the wider society for an appreciable period of time, together lead an enclosed, formally administered round of life. Prisons serve as a clear example, providing we appreciate that what is prison-like about prisons is found in institutions whose members have broken no laws. This volume deals with total institutions in general and, mental hospitals, in particular. The main focus is, on the world of the inmate, not the world of the staff. A chief concern is to develop a sociological version of the structure of the self. Each of the essays in this book were intended to focus on the same issue--the inmate's

situation in an institutional context. Each chapter approaches the central issue from a different vantage point, each introduction drawing upon a different source in sociology and having little direct relation to the other chapters. This method of presenting material may be irksome, but it allows the reader to pursue the main theme of each paper analytically and comparatively past the point that would be allowable in chapters of an integrated book. If sociological concepts are to be treated with affection, each must be traced back to where it best applies, followed from there wherever it seems to lead, and pressed to disclose the rest of its family.

*The Law of Attraction* - Esther Hicks 2006-10-01

The New York Times best-selling authors of *Ask and It Is Given* and *The Law of Deliberate Intent* This book presents the powerful basics of the original Teachings of Abraham. Within these pages, you'll learn how all things, wanted and unwanted, are brought to you by this most powerful law of the universe, the Law of Attraction (that which is like unto itself is drawn). You've most likely heard the saying "Like attracts like," "Birds of a feather flock together," or "It is done unto you as you believe" (a belief is only a thought you keep thinking); and although the Law of Attraction has been alluded to by some of the greatest teachers in history, it has never before been explained in as clear and practical terms as in this latest book by New York Times best-selling authors, Esther and Jerry Hicks. Learn here about the omnipresent Laws that govern this Universe and how to make them work to your advantage. The understanding that you'll achieve by reading this book will take all the guesswork out of daily living. You'll finally understand just about everything that's happening in your own life as well as in the lives of those you're interacting with. This book will help you to joyously be, do, or have anything that you desire!

**Parliamo Italiano!** - Suzanne Branciforte 2001-11-12

The Second Edition of *Parliamo italiano!* instills five core language skills by pairing cultural themes with essential grammar points. Students use culture—the geography, traditions, and history of Italy—to understand and master the language. The 60-minute *Parliamo italiano!* video features stunning, on-location footage of various cities and regions throughout Italy according to a story line corresponding to each unit's theme and geographic focus.

**Homosexuality and Italian Cinema** - Mauro Giori 2017-11-18

This book is the first to establish the relevance of same-sex desires, pleasures and anxieties in the cinema of post-war Italy. It explores cinematic representations of homosexuality and their significance in a wider cultural struggle in Italy involving society, cinema, and sexuality between the 1940s and 1970s. Besides tracing the evolution of representations through both art and popular films, this book also analyses connections with consumer culture, film criticism and politics. Giori uncovers how complicated negotiations between challenges to and valorization of dominant forms of knowledge of homosexuality shaped representations and argues that they were not always the outcome of hatred but also sought to convey unmentionable pleasures and complicities. Through archival research and a survey of more than 600 films, the author enriches our understanding of thirty years of Italian film and cultural history.

Papaya Salad - Elisa Macellari 2020-11-03

The debut graphic novel from Thai-Italian illustrator Elisa Macellari, *Papaya Salad* tells the story of her great-uncle Sompong who found himself in Europe on military scholarship on the eve of World War II. A gentle and resolute man in love with books and languages, in search of his place in the world, Sompong chronicles his life during the war and falling for his wife, finding humor and joy even as the world changes irrevocably around him This Winner of the 2019 Autori di Immagini Silver Medal in the Comics category tells the human story of the War, from a perspective not typically seen. "An historical and emotional journey through my family and my roots that are grown between Europe and Asia. A personal narrative that needs to be shared and hopefully arouses empathy in the reader." -- Elisa Macellari

*Psyche and Matter* - Marie-Louise Von Franz 2001-05-01

Twelve essays by the distinguished analyst Marie-Louise von Franz—five of them appearing in English for the first time—discuss synchronicity, number and time, and contemporary areas of rapprochement between the natural sciences and analytical psychology with regard to the relationship between mind and matter. This last question is among the most crucial today for fields as varied as microphysics, psychosomatic medicine, biology, quantum physics, and depth psychology.

**Molecules Of Emotion** - Candace Pert 2012-12-11

Why do we feel the way we feel? How do our thoughts and emotions affect our health? Are our bodies and minds distinct from each other or do they function together as part of an interconnected system? In *MOLECULES OF EMOTION*, neuroscientist Candace Pert provides startling and decisive answers to these long-debated questions, establishing the biomolecular basis for our emotions and explaining these new scientific developments in a clear and accessible way. Her pioneering research on how the chemicals inside us form a dynamic information network, linking mind and body, is not only provocative, it is revolutionary. In her groundbreaking book, Candace Pert offers a new scientific understanding of the power of our minds and our feelings to affect our health and well-being.

**Handbook of Perinatal Clinical Psychology** - Rosa Maria Quatraro 2020-03-26

The book examines the major issues in perinatal clinical psychology with the presence of theoretical information and operational indications, through a biopsychosocial approach. The multiplicity of scientific information reported makes this book both a comprehensive overview on the major perinatal mental health disorders and illnesses, and a clinical guide. It covers perinatal clinical psychology through a journey of 15 chapters, putting the arguments on a solid theoretical basis and reporting multiple operational indications of great utility for daily clinical practice. It has well documented new evidence bases in the field of clinical psychology that have underpinned the conspicuous current global and national developments in perinatal mental health. As such, it is an excellent resource for researchers, policy makers, and practitioners - in fact, anyone and everyone who wishes to understand and rediscover, in a single opera, the current scientific and application scenario related to psychological health during pregnancy and after childbirth.

The 5 Biological Laws and Dr. Hamer's New Medicine - Andrea Taddei 2020

The German New Medicine discovered by Dr. Ryke Geerd Hamer and systematized in the 5 Biological Laws represents a change in the understanding of what is commonly called a disease. The German New Medicine is not a new method of treatment but the understanding of natural laws applicable to humans and animals. Through his studies, Dr. R.G. Hamer, came to the conclusion that the disease processes are not "errors of nature" but rather Significant Biological Programs of Nature stemming from sudden and dramatic events. This book was written with the intent of shedding light on the understanding of the 5 Biological Laws, for those looking for and wanting to understand the issue fully; the study of matter and the spirit, whether reflective, critical and scientific, is up to the reader. *The Mastery of Love: a Practical Guide to the Art of Relationship: a Toltec Wisdom Book* by Don Miguel Ruiz - Don Ruiz 2018-07

In *The Mastery of Love*, don Miguel Ruiz illuminates the fear-based beliefs and assumptions that undermine love and lead to suffering and drama in our relationships. Using insightful stories to bring his message to life, Ruiz shows us how to heal our emotional wounds, recover the freedom and joy that are our birthright, and restore the spirit of playfulness that is vital to loving relationships. *The Mastery of Love* includes: \* Why "domestication" and the "image of perfection" lead to self-rejection \* The war of control that slowly destroys most relationships \* Why we hunt for love in others, and how to capture the love inside us \* How to finally accept and forgive ourselves and others "Happiness can only come from inside of you and is the result of your love. When you are aware that no one else can make you happy, and that happiness is the result of your love, this becomes the greatest mastery of the Toltec: the Mastery of Love." - don Miguel Ruiz

*Dallas 1963* - Bill Minutaglio 2013-10-08

Winner of the PEN Center USA Literary Award for Research Nonfiction Named one of the Top 3 JFK Books by Parade Magazine. Named 1 of The 5 Essential Kennedy assassination books ever written by The Daily Beast. Named one of the Top Nonfiction Books of 2013 by Kirkus Reviews. In the months and weeks before the fateful November 22nd, 1963, Dallas was brewing with political passions, a city crammed with larger-than-life characters dead-set against the Kennedy presidency. These included rabid warriors like defrocked military general Edwin A. Walker; the world's richest oil baron, H. L. Hunt; the leader of the largest Baptist congregation in the world, W.A. Criswell; and the media mogul Ted Dealey, who raucously confronted JFK and whose family name adorns the plaza where the president was murdered. On the same stage was a compelling cast of marauding gangsters, swashbuckling politicians, unsung civil rights heroes, and a stylish millionaire anxious to save his doomed city. Bill Minutaglio and Steven L. Davis ingeniously explore the swirling forces that led many people to warn President Kennedy to avoid Dallas on his fateful trip to Texas. Breathtakingly paced, DALLAS 1963 presents a clear, cinematic, and revelatory look at the shocking tragedy that transformed America. Countless authors have attempted to explain the assassination, but no one has ever bothered to explain Dallas-until now. With spellbinding storytelling, Minutaglio and Davis lead us through intimate glimpses of the Kennedy family and the machinations of the Kennedy White House, to the obsessed men in Dallas who concocted the climate of hatred that led many to blame the city for the president's death. Here at long last is an accurate understanding of what happened in the weeks and months leading to John F. Kennedy's assassination. DALLAS 1963 is not only a fresh look at a momentous national tragedy but a sobering reminder of how radical, polarizing ideologies can poison a city-and a nation.

*Anatomia della Coppia* - Erica Francesca Poli 2015-09-28

"L'amore è un argomento da comprendere vivendolo. Questo libro è un valido aiuto." Un libro dedicato alla realizzazione della più alta coscienza di sé attraverso l'esperienza della coppia scritto con la solita grazia e rigore scientifico che contraddistinguono l'autrice. Quando siamo in coppia, ci interroghiamo su una esperienza di coppia finita o creiamo una nuova coppia, assai di frequente dimentichiamo che la coppia è un terzo rispetto ai due che la compongono. Ha le sue regole, le sue fasi, i suoi bisogni, la sua coscienza. Molto spesso le difficoltà che incontriamo nelle faccende d'amore sono legate proprio a questo, all'incapacità di leggere e guidare la coppia costruendo la vera unione che è appunto il terzo essere fatto dai due. Cosa significa esattamente unione? Come creare l'unione nella coppia? Un viaggio verso l'amore incondizionato e la vera felicità interiore, che prende le mosse dalle più recenti scoperte delle neuroscienze e della psicologia energetica, fino a raggiungere le vette di una riflessione sull'Anima e il salto di Coscienza che l'Amore ci offre, arricchito da casi e storie reali e corredato di un vademecum per la coppia felice davvero applicabile ed efficace. L'AUTRICE: La dott. Erica F. Poli è medico psichiatra, psicoterapeuta e counselor. Membro di molte società scientifiche, tra cui IEDTA (International Experiential Dynamic Therapy Association), ISTDP Institute e OPIFER (Organizzazione Psicoanalisti Italiani Federazione e Registro), annovera un'approfondita ed eclettica formazione psicoterapeutica che le ha fornito la capacità di affrontare il mondo della psiche fino alla spiritualità, sviluppando un personale metodo di lavoro interdisciplinare e psicosomatico.

*The Complete Prophecies of Nostradamus* - Nostradamus 2009

Provides the complete prophecies of Nostradamus, accompanied by new interpretations of the seer's predictions with analysis that includes the dates on which the predictions would occur.

*Heaven and Hell* - Emanuel Swedenborg 1758

*Love in a Time of Loneliness* - Paul Verhaeghe 2018-04-17

The first essay, "The Impossible Couple", is both a humorous and razor-sharp analysis of the contemporary relationship between man and woman. In the second essay, "Fleeing Fathers", the author demonstrates that

today the Freudian Oedipus complex has disappeared, with a resulting shattering of classic gender roles. Post-modern morals are strange compared to previous morality, because they convey an obligation to enjoy. Things become even stranger when one finds that the expected enjoyment fails to come and, instead of that, we are faced with boredom, anxiety, and anger. The author reconsiders the opposition between Eros and Thanatos as an opposition between two forms of sexual pleasure. The fact that this opposition is ever present in heterosexual love demonstrates that gender differentiation goes beyond temporal cultural forms. Accessibly written and provocatively argued, *Love in a Time of Loneliness* is a polemic whose very informality belies its serious intent. In these three fascinating essays, The author leaves the ordinary paths of thinking and sets out to discover what drives us in sex and love.

**PSYCHOANALYTIC ENERGY PSYCHOTHERAPY** - PHIL MOLLON 2019-06-14

**The Mastery of Love CD** - Don Miguel Ruiz 2005-01-24

Using inspirational stories to impart the ancient wisdom of the three Toltec masteries--awareness, transformation, and love--the author examines the common fallacies that can undermine love, and tells listeners how to gain wisdom, avoid fear, and end the battle for control with their partners.

*Come un fiore tra le ortiche* - Francesca Costantini 2017-10-04

Nella presente opera l'Autrice, anche attraverso il racconto di diversi casi clinici, aiuta a comprendere i volti dell'Amore e l'inganno e l'illusione delle passioni. Nelle relazioni amorose, quando a scendere in campo è l'Ego, la coppia stessa diventa una società di servizio, in cui a farla da padroni sono avventurieri, strozzini, giocolieri, burattinai e predatori di anime, che chiedono all'Altro molto di più di quello che riescono a dare. Nei casi in cui a scendere in campo è l'Anima, l'Amore torna nel territorio che gli appartiene e l'unione vera, piena ed autentica si realizza, aperta al mistero, al terreno e al divino, Creata ed alla Creazione.

**No-fault Divorce** - Werner J Feld 2019-03-04

**Love Is a Story** - Robert J. Sternberg 1999-06-03

In this groundbreaking work, Robert Sternberg opens the book of love and shows you how to discover your own story--and how to read your relationships in a whole new light. What draws us so strongly to some people and repels us from others? What makes some relationships work so smoothly and others burst into flames? Sternberg gives us new answers to these questions by showing that the kind of relationship we create depends on the kind of love stories we carry inside us. Drawing on extensive research and fascinating examples of real couples, Sternberg identifies 26 types of love story--including the fantasy story, the business story, the collector story, the horror story, and many others--each with its distinctive advantages and pitfalls, and many of which are clashingly incompatible. These are the largely unconscious preconceptions that guide our romantic choices, and it is only by becoming aware of the kind of story we have about love that we gain the freedom to create more fulfilling and lasting relationships. As long as we remain oblivious to the role our stories play, we are likely to repeat the same mistakes again and again. But the enlivening good news this book brings us is that though our stories drive us, we can revise them and learn to choose partners whose stories are more compatible with our own. Quizzes in each chapter help you to see which stories you identify with most strongly and which apply to your partner. Are you a traveler, a gardener, a teacher, or something else entirely? *Love is a Story* shows you how to find out.

**The Anatomy of Healing** - Erica Francesca Poli 2017-07-01

What is healing? What really determines it? How can we make it happen? It is increasingly clear that there is not just one single kind of medicine and that paths to healing flow through the integration of multiple pieces of knowledge and the combination of many perspectives. In light of the latest research into neurophysiology, psyche science and quantum physics, this book outlines the seven principles of the powerful interaction between psyche and body in healing processes, providing scientific answers to questions about the mechanisms which trigger it and identifying therapies that allow us to turn these internal switches on. This is demonstrated through reflections, examples, and real cases shared by the author, a psychiatrist and doctor who has completed several rigorous trainings but maintains an open mind and has been committed for more than 15 years to seek healing of serious illnesses in the psychosomatic

unit by using therapeutic synergies that strengthen official care practices with innovative treatments, with her passionate work to painlessly repair suffering, with the patient, or rather the person, always and constantly at the centre.

Goethe's Theory of Colours - Johann Wolfgang von Goethe 1840

This work by Johann Wolfgang von Goethe (1749-1832) was translated into English in 1840 by Sir Charles Eastlake (1793-1865), painter and later keeper of the National Gallery. Goethe's 1810 work was rejected by many contemporary scientists because it appeared to contradict the physical laws laid down by Newton. However, its focus on the human perception of the colour spectrum, as opposed to the observable optical phenomenon, was attractive to, and influential upon, artists and philosophers. As Eastlake says in his preface, the work's dismissal on scientific grounds had caused 'a well-arranged mass of observations and experiments, many of which are important and interesting', to be overlooked. Eastlake also puts Goethe's work into its aesthetic and scientific context and describes its original reception. His clear translation of Goethe's observations and experiments on colour and light will appeal to anyone interested in our responses to art.

**Requiem** - Antonio Tabucchi 2002

While waiting for a private midnight assignation on a quay by the Tagus, the narrator spend his day, enjoying a series of chance encounters with such colorful characters as a young junky, a gypsy, a lost taxi driver, the ghost of the long dead poet Fernando Pessoa, and many others, both real and imaginary as he makes his way around Lisbon. Reprint.

Anatomia della Guarigione - Erica Francesca Poli 2014-07-01

Nella mente di molti - ricercatori, medici e pazienti - si sta facendo strada la convinzione che il corpo e il cervello parlano fra loro e si influenzano reciprocamente, nella salute come nella malattia. Questa convinzione, già ben chiara nei saperi della medicina ippocratica e delle medicine orientali, trova oggi fondamento scientifico nelle neuroscienze, nella Psiconeuroendocrinologia, nella medicina centrata sulle emozioni come ponte tra psiche e soma e sull'energia come chiave essenziale della vita. Cos'è la guarigione? Cosa la determina veramente? Come far sì che accada? È ormai sempre più chiaro che non esiste una sola e unica medicina e che le strade della guarigione scorrono necessariamente attraverso l'integrazione di più saperi e di più prospettive. Alla luce delle più recenti ricerche di neurofisiologia, scienze della psiche e fisica quantistica, questo libro esplica i sette principi della potente interazione tra psiche e corpo nei processi di guarigione, fornendo risposte scientifiche agli interrogativi sui meccanismi che la attivano e individuando terapie che consentono di accendere questi interruttori profondi. E lo fa attraverso riflessioni, esempi e casi reali raccontati da una psichiatra, un medico eclettico, dalla formazione rigorosa ma dalla mente aperta, impegnata da ormai più di 15 anni nel cercare la strada verso la guarigione di patologie anche gravi dell'unità psicosoma, utilizzando sinergie terapeutiche che rafforzano le cure ufficiali con trattamenti innovativi, in una appassionata attività di instancabile riparazione della sofferenza, con il paziente, o meglio la persona, sempre, costantemente al centro. "Leggere questo libro mi ha emozionato, all'autrice va tutta la mia più sincera gratitudine per aver messo a disposizione di tutti le sue preziose conoscenze" L'AUTRICE: La dott. Erica F. Poli è medico psichiatra, psicoterapeuta e counselor.

Membro di molte società scientifiche, tra cui IEDTA (International Experiential Dynamic Therapy Association), ISTDPIstitute e OPIFER (Organizzazione Psicoanalisti Italiani Federazione e Registro), annovera un'approfondita ed eclettica formazione psicoterapeutica che le ha fornito la capacità di affrontare il mondo della psiche fino alla spiritualità, sviluppando un personale metodo di lavoro interdisciplinare e psicosomatico.

**The Anatomy of the Couple** - Erica Francesca Poli 2018-06-07

When we are in a couple, when we question ourselves about the experience of coupledness or as we form a new partnership, very often we forget that the couple is a third compared to the two that compose it. The couple has its own rules, its phases, its needs, its conscience. Very often the difficulties that we encounter in the affairs of love are linked precisely to this, to the inability to read and guide the couple by building a true union that recalls this third being made by two. What exactly does that mean? How can we create union in the couple? A journey towards unconditional love and true inner happiness, starting with the most recent discoveries in neuroscience and energetic psychology, which leads to the peaks of a reflection on the Soul and the leap of Conscience that Love offers us, enriched by real cases and stories and accompanied by a practical guide for the happy couple which is both comprehensive and effective. The love which we can live today is no longer destined to make us suffer, but to make us free. Now, more than ever, we can know its anatomy and penetrate its mysteries. Erica F. Poli is a psychiatric doctor, psychotherapist and counsellor. As a member of scientific societies including IEDTA, ISTDPIstitute and OPIFER, her background includes a profound and eclectic psychotherapeutic training that has granted her the skill to bridge the world of the psyche with that of spirituality. Therein she has developed her own personal interdisciplinary and psychosomatic working method which is continuously updated through her active participation in and organization of courses, congresses and scientific publications. She is dedicated to the development of Integrative Medicine with the implementation of traditional pharmacology with phyto and nutraceuticals, and the use of innovative and deeply rooted therapeutic techniques grounded in modern neuro-scientific knowledge on the functioning of the mind. She is not limited by treating single psychic disturbances but takes care of and shows attention to each person as a mind-body whole.

Screening the Body - Lisa Cartwright 1995

Moving images are used as diagnostic tools and locational devices every day in hospitals, clinics and laboratories. But how and when did such issues come to be established and accepted sources of knowledge about the body in medical culture? How are the specialized techniques and codes of these imaging techniques determined, and whose bodies are studied, diagnosed and treated with the help of optical recording devices? "Screening the Body" traces the unusual history of scientific film during the late 19th and early 20th centuries, presenting material that is at once disturbing and engrossing. Lisa Cartwright looks at films like "The Elephant Electrocutation". She brings to light eccentric figures in the history of the science film such as William P. Spratling who used Biograph equipment and crews to film epileptic seizures, and Thomas Edison's lab assistants who performed x-ray experiments on their own bodies. Drawing on feminist film theory, cultural studies, the history of film, and the writings of Foucault, Lisa Cartwright illustrates how this scientific cinema was a part of a broader tendency in society toward the technological surveillance, management, and physical transformation of the individual body and the social body. She frequently points out the similarities of scientific film to works of avant-garde cinema, revealing historical ties among the science film, popular media culture and elite modernist art and film practices. Ultimately, Cartwright unveils an area of film culture that has rarely been discussed, but which will leave readers scouring video libraries in search of the films she describes.
