The Onion Book of Known Knowledge - The Onion
2012-10-23

Are you a witless cretin with no reason to live? Would you like to know more about every piece of knowledge ever? Do you have cash? Then congratulations, because just

in time for the death of the print industry as we know it comes the final book ever published, and the only one you will ever need: The Onion's compendium of all things known. Replete with an astonishing assemblage of facts, illustrations, maps,

charts, threats, blood, and additional fees to edify even the most simple-minded book-buyer, THE ONION BOOK OF KNOWN KNOWLEDGE is packed with valuable information-such as the life stages of an Aunt; places to kill one's self in Utica, New York; and the dimensions of a female bucket, or "pail." With hundreds of entries for all 27 letters of the alphabet, THE ONION BOOK OF KNOWN KNOWLEDGE must be purchased immediately to avoid the sting of eternal ignorance.

Electric and Hybrid Cars - Curtis D. Anderson 2010-03-30

This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The important marketing shift from a "woman's car" to "going green" is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered.

The History and Future of Technology - Robert U. Ayres 2021

Eminent physicist and economist, Robert Ayres, examines the history of

technology as a change agent in society, focusing on societal roots rather than technology as an autonomous, self-perpetuating phenomenon. With rare exceptions, technology is developed in response to societal needs that have evolutionary roots and causes. In our genus Homo, language evolved in response to a need for our ancestors to communicate, both in the moment, and to posterity. A band of hunters had no chance in competition with predators that were larger and faster without this type of organization, which eventually gave birth to writing and music. The steam engine did not leap fully formed from the brain of James Watt. It evolved from a need to pump water out of coal mines, driven by a need to burn coal instead of firewood, in turn due to deforestation. Later, the steam engine made machines and mechanization possible. Even quite simple machines increased human productivity by a factor of hundreds, if not thousands. That was the

Industrial Revolution. If we count electricity and the automobile as a second industrial revolution, and the digital computer as the beginning of a third, the world is now on the cusp of a fourth revolution led by microbiology. These industrial revolutions have benefited many in the short term, but devastated the Earth's ecosystems. Can technology save the human race from the catastrophic consequences of its past success? That is the question this book will try to answer. *The Potomac and the Chesapeake* - 1986

Global Crisis, Local Voices -
Gabriele Piazza 2019-04-01
In an interconnected and globalized world, the voices of the local communities struggle to make themselves heard on the international stage. But many issues that arise within international relations have consequences for ordinary lives and are therefore closely

connected. Climate change, warfare and migration are all examples of this. They are often discussed in abstract terms with relation to international diplomacy, but threaten the actual livelihoods of small communities and ordinary people. This was the setting of the conference 'Global Crisis, Local Voices', held in May 2018. This journal is a compilation of the papers presented at that conference, which was the second 'DEN International Student Conference'. The conference and this publication is one of the many projects that the Democratic Education Network (DEN) is responsible for since its launch in 2016. This book is a collection of diverse works, all written by student authors from a range of different universities. From Democracy and Ideology, to Climate Change and China, it covers numerous concepts, ideas and geographical regions, that are often found in the studies of Politics and International Relations. This book is the result of passion and hard work

from all students involved in its production and it is a project that we in DEN are incredibly proud of and hope to continue in the future. "I encourage you to read these publications to catalyse views in you that stimulate great debate that helps you become part of the compassionate, progressive and responsible movement of young people that will help overcome injustices in the world and make the world a better place." Dr Peter Bonfield OBE FEng Vice-Chancellor and President University of Westminster

Girl, 15, Charming but Insane - Sue Limb 2007-12-18

Life was tragic enough before this spring started. With a distinct lack of boobage and an arse so big that birds of prey could nest within its shadows, Jess Jordan is saddled with the Goddess Flora for a best friend, a Britney Spears look-alike so gorgeous that one grain of her divine dandruff could make the blind see again. Jess knows that her soul mate is Ben Jones, a divine mixture of Leonardo diCaprio, Prince William, and

Brad Pitt who oozes mystery and charisma. But the campaign to get Ben to notice her brings on a cavalcade of mortification and disaster, including, but not limited to, a minestrone soup explosion that takes place in her bra and a schoolwide viewing of a videotape that features a topless Jess referring to her breasts as "Bonnie" and "Clyde." Meanwhile, Jess's death-obsessed Granny moves into her bedroom, along with her grandfather's remains; her hypochondriac dad, who sends her daily "horrorscopes" like "You will fall asleep with your mouth open, and a family of earwigs will move in," acts strange about Jess staying with him this summer; and her longtime friend Fred, a television violence addict and closet thumbsucker, has decided that he can't stand being around her. Jess is determined to make things right . . . but with her offbeat sense of humor and her wildly active imagination, things get complicated along the way.

Quantum of Nightmares -

Charles Stross 2022-01-11

A unique blend of espionage thrills and Lovecraftian horror, Hugo Award-winning author Charles Stross's Laundry Files continues with *Quantum of Nightmares*. It's a brave new Britain under the New Management. The avuncular Prime Minister is an ancient eldritch god of unimaginable power. Crime is plummeting as almost every offense is punishable by death. And everywhere you look, there are people with strange powers, some of which they can control, and some, not so much. Hyperorganized and

formidable, Eve Starkey defeated her boss, the louche magical adept and billionaire Rupert de Montfort Bigge, in a supernatural duel to the death. Now she's in charge of the Bigge Corporation—just in time to discover the lethal trap Rupert set for her long ago. Wendy Deere's transhuman abilities have gotten her through many a scrape. Now she's gainfully employed investigating unauthorized supernatural shenanigans. She swore to herself she wouldn't again get entangled with Eve Starkey's bohemian brother Imp and his crew of transhuman misfits. Yeah, right. Mary Macandless has powers of her own. Right now she's pretending to be a nanny in order to kidnap the children of a pair of famous, Government-authorized superheroes. These children have powers of their own, and Mary Macandless is in way over her head. Amanda Sullivan is the HR manager of a minor grocery chain, much oppressed by her glossy blonde boss—who is cooking up an

appalling, extralegal scheme literally involving human flesh. All of these stories will come together, with world-bending results... "For all of Stross's genuine ability to spook and dismay, The Laundry Files are some of the most tremendously humane books I've ever read." —Tamsyn Muir, author of Gideon the Ninth and Harrow the Ninth At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Cambridge History of Travel Writing - Nandini Das
2019-01-24

Bringing together original contributions from scholars across the world, this volume traces the history of travel writing from antiquity to the Internet age. It examines travel texts of several national or linguistic traditions, introducing readers to the global contexts of the genre. From wilderness to the urban, from Nigeria to the polar regions, from mountains to rivers and the desert, this book explores some of the key places and physical features represented in travel writing. Chapters also consider the employment in travel writing of the diary, the letter, visual images, maps and poetry, as

well as the relationship of travel writing to fiction, science, translation and tourism. Gender-based and ecocritical approaches are among those surveyed. Together, the thirty-seven chapters here underline the richness and complexity of this genre.

Of Plants and People -

Charles Bixler Heiser 1992

What are the origins of agriculture? How did people learn to domesticate plants? How did they come to improve some? How did they learn special techniques for processing certain plants for food? In these highly personal and informal essays-old-fashioned botany, the author calls them-noted botanist Charles Heiser investigates those and other questions raised by the interactions of plants and people. His purpose is to try to find the origins of some of our domesticated

plants and to consider other plants that might someday contribute to our food resources. In *Of Plants and People*, Heiser examines the origins of pumpkins, squashes, and other cucurbits. In *The Totora and Thor*, he digresses from food plants to trace the spread of the totora reed from South America to Pacific islands. *Little Oranges of Quito* is about the domestication of a wild plant, the naranjilla, that is going on today. *Chenopods: From Weeds to the Halls of Montezuma* concerns the uses of the Andean quinoa and its relatives, and *Sangorache and the Day of the Dead, A Trip to Tulcán, and Chochos and Other Lupines* all examine Latin-American domestic plants that could contribute to our own foods. *Green 'Tomatoes' and Purple 'Cucumbers*, the tomato and the pepino, respectively, describes two other crops that have received scant notice in the United States. The subject of "How Many Kinds of Peppers Are There?" is the genus *Capsicum*, with its sweet green and hot red peppers and all

their related species and varieties. Heiser again writes about nonfood plants in the essay "Peperomias," but in the next chapter, "Sumpweed," he discusses a plant that was once used for food but that has been neglected in favor of others. And in "A Plague of Locusts" the author compares the honey locust tree with a close relative to try to determine what gives particular plants advantages in certain environments. In his final essay, *Seeds, Sex, and Sacrifice*, Heiser relates myth, anthropological evidence, and botanical findings to review the connection between religion and the origin of agriculture. The audience for this book will include botanists, horticulturists, anthropologists, and any reader interested in the interrelationships between plants and people.

Substrate Analysis for Effective Biofuels Production - Neha Srivastava 2020-01-31

As a substrate, cellulose plays a crucial role in the biomass-based biofuel production process, and is essential to enzyme and sugar production. Accordingly, ensuring maximum availability of cellulose for enzyme production and bioconversion for sugar generation is one of the major challenges for sustainable biofuels production. To date there has been extensive research on biofuel production using lignocellulosic biomass, but

there is a huge gap when it comes to the critical analysis of cellulose content, structural feasibility, availability, and economic processing, so that it can be converted for enzyme and fuel production at low cost. Consequently, this book discusses the availability of lignocellulosic substrate for biofuel production in light of the challenges that the biofuels industry is currently facing. After identifying the major substrate selection challenges for the practical biofuel production process, the book addresses said challenges by focusing on various issues such as: potential substrates that have high cellulosic content, structural feasibility, and low-cost & effective processing to remedy the structural complexity of biomass structure and create added value. In addition, it covers recent advancements in cellulase production and outlines future prospects. Given its scope, it offers a valuable guide for research students and industry practitioners alike.

In Praise of Profits! - Edward Yardeni 2021-11-05

There has been much confusion about corporate profits. As a result, there has been lots of sloppy analysis and misinformed discussion of such important issues as the central role of profits in economic growth, the trend of profits, the corporate tax rate, the profit margin, profits' share of national income, and corporate share buybacks. The confusion has played into the hands of progressives, who claim that the profit motive results in income and wealth inequality. As I will show in this study, their narrative of the relationship between profits and prosperity is wrong and misleadingly pessimistic. Market-driven profit is the source of widespread prosperity, not its nemesis.

Brand New Justice - Simon Anholt 2006-08-11

Recently vilified as the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour of the

economically underprivileged. *Brand New Justice*, now in a revised paperback edition, systematically analyses the success stories of the Top Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation

to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms.

Super Dog! - Pamela Butchart
2016-08-23

The Futurist Moment -
Marjorie Perloff 2003-12-03
This volume examines the flourishing of Futurist aesthetics in the European art and literature of the early twentieth century. Futurism

was an artistic and social movement that was largely an Italian phenomenon, though there were parallel movements in Russia, England and elsewhere. The Futurists admired speed, technology, youth and violence, the car, the airplane and the industrial city, all that represented the technological triumph of humanity over nature. This work looks at the prose, visual art, poetry, and the manifestos of Futurists from Russia to Italy. The author reveals the Moment's impulses and operations, tracing its echoes through the years to the work of "postmodern" figures like Roland Barthes. This updated edition reexamines the Futurist Moment in the light of a new century, in which Futurist aesthetics seem to have steadily more to say to the present

This Is Not an Atlas -

2018-11-30

This Is Not an Atlas gathers more than 40 counter-cartographies from all over the world. This collection shows

how maps are created and transformed as a part of political struggle, for critical research or in art and education: from indigenous territories in the Amazon to the anti-eviction movement in San Francisco; from defending commons in Mexico to mapping refugee camps with balloons in Lebanon; from slums in Nairobi to squats in Berlin; from supporting communities in the Philippines to reporting sexual harassment in Cairo. This Is Not an Atlas seeks to inspire, to document the underrepresented, and to be a useful companion when becoming a counter-cartographer yourself.

Absolute Torture! - Sue Limb
2012-01-05

Disaster! Jess tried to hide her horror. Her mum frowned.

'What's wrong, sweetheart? It's what you've always wanted!'

Jess's mum has finally given in and arranged a trip to see Jess's dad. But this is so the wrong moment: Jess has just got it together with Fred, and in an incredibly romantic way he has scraped money together to get them both tickets to the hottest music festival . . . but instead Jess is going on a road trip with her mum and her grandmother (and her grandfather, but he doesn't quite count as he is ashes in an urn). Jess is keen to keep in touch with Fred by text while she is away, but after a while he just stops responding. And

her best friend Flora is now going to the exact same music festival Jess was supposed to go to! Jess can't help her paranoia about Fred working overtime. If Jess isn't careful, her worries are going to completely spoil her much-wanted visit to her dad. But when she gets there, it turns out that everybody has a surprise for each other. Needless to say, some work out better than others . . . In this sequel Sue Limb has surpassed herself. The writing is still fresh, funny and effervescent, but at the same time Sue has captured the difficult, prickly but, above all, loving relationship between a daughter and her parents.

But cooperation is not easy in a world dominated by individual, cultural, and national selfish interests. The opposition to cooperation means that cooperation is not natural, but must be instituted through an intellectual and social struggle against countervailing forces. This book discusses issues that are

necessary to describe the nature of cooperation and how it can be promoted as a social and ethical ideal amidst a sea of competing interests. Dr. Ratner uses the framework of cooperativism, that is the system of social institutions, social philosophy, cultural psychology and politics that promotes cooperation, as a starting point. Elements of cooperativism are derived from a rigorous analysis of various sources, including the needs of tendencies of human culture and human psychology.
