Managing Voluntary Sport Organisations - Leigh Robinson 2010

Contemporary sport could not function without the involvement of voluntary organizations, from local grass-roots clubs to international agencies such as the International Olympic Committee. Management of this sector continues to undergo profound change, largely in response to the challenges of professionalization and increasing expectations in terms of transparency, accountability and ethical behaviour. This book fills a significant gap in the literature on sport management by setting out the principles and practices necessary for effective management of voluntary sport organizations around the world. In addition to applying and adapting established management strategies and techniques to voluntary sport organizations, this book is the first to fully relate mainstream organizational theory to this important sector of sport management. With contributions from an international team of researchers and management practitioners, the book explores key functional areas such as: governance strategy and planning human resources finance managing change marketing event management risk management. Each chapter discusses best practice and includes case study material, self test questions and guides to further reading. As the only book to outline a professional, theoretically informed and practically focused curriculum for voluntary sport management, this book is essential reading for all students of sport management and all managers working in or alongside the voluntary sector.

Essays in Phenomenology - Maurice Natanson 2013-12-19

Fifteen years ago, Dorion Cairns concluded an article on phenome nology with a cautious appraisal of its influence in America. "Thus far," he wrote, "it continues to be an exotic." The situation today has changed: translations of the writings of Husserl, Heidegger, Marcel, Sartre, and Merleau-Ponty have appeared, and commentaries on these and related thinkers are not uncommon. Moreover, discussion of phenomenological problems is increasingly becoming part of the American (if not the British) philosophical scene.

Phenomenology is in danger of domestication! Signs of its accommodation include a willingness to pay tribute to Husserl's Logical Investigations by those who find relatively little to interest them in his later work, a location of what are taken to be common themes and underlying convergences of emphasis in Continental phenomenology and Anglo-American philosophy of the more nearly Wittgensteinian and Austinian varieties, and a growing impatience (shared by some phenomenologists) with expositions, explications, and interpretations of Husserl's work at the expense of original applications of

phenomenology. Most bluntly put, the attitude is: Don't talk about it; do it! It would seem that we have arrived at a point where introductions to phenomenology are of doubt ful value, if not superfluous. The present collection of essays is based on different assumptions and points to an alternative conception of the role of both methodology and originality in phenomenological work

Incredible Teachers - Carolyn Webster-Stratton 2012-01-01

Learning-Driven Schools - Barry Beers 2006-06-15

Many teachers are trained to approach their work with a set of teaching strategies and lessons that changes little over time. Because they are focused on how they teach, rather than on how their students learn, they use the same techniques day after day, making no adjustments for students' different learning needs. In *Learning-Driven Schools: A Practical Guide for Teachers and Principals*, Barry Beers shows how teachers can plan, teach, and assess for student learning--and how principals can support teachers in their efforts. The book includes * An overview of the research on knowledge retention; * Real-life samples of lesson plans that address state and local standards; * Strategies on accurately assessing student learning; * Advice for teachers on addressing the needs of struggling, intermediate, and advanced students at the same time; and * Advice for administrators on conducting effective classroom observations. A rallying cry and how-to guide rolled into one, this book is an invaluable resource for anyone passionate about learning. Having served as a veteran teacher and principal himself, Barry Beers brings his own experience and understanding to bear on the essential task of ensuring that student learning remains the clear focus of our schools.

Making the Connections 3 - Anne B. Padias 2015-03-06

For Better or For Worse? Collaborative Couples in the Sciences - Annette Lykknes 2012-06-05

In this volume, a distinguished set of international scholars examine the nature of collaboration between life partners in the sciences, with particular attention to the ways in which personal and professional

dynamics can foster or inhibit scientific practice. Breaking from traditional gender analyses which focus on divisions of labor and the assignment of credit, the studies scrutinize collaboration as a variable process between partners living in the nineteenth and twentieth centuries who were married and divorced, heterosexual and homosexual, aristocratic and working-class and politically right and left. The contributors analyze cases shaped by their particular geographical locations, ranging from retreat settings like the English countryside and Woods Hole, Massachusetts, to university laboratories and urban centers in Berlin, Stockholm, Geneva and London. The volume demonstrates how the terms and meanings of collaboration, variably shaped by disciplinary imperatives, cultural mores, and the agency of the collaborators themselves, illuminate critical intellectual and institutional developments in the modern sciences.

Essentials of Health Care Finance - William Cleverley 2011

Essentials of Health Care Finance stands firmly in its place as the leading textbook on healthcare finance. No other text so completely blends the best of current finance theory with the tools needed in day-to-day practice. Useful for all course levels as well as a professional reference, this text offers a comprehensive introduction to the field. The Seventh Edition has been thoroughly revised to reflect the current economic environment in the healthcare industry, with thoughtful descriptions and 'real-world' examples. As the not-for-profit health care sector has increasingly come under attack by legislators seeking new sources of tax revenue, this edition also features a new chapter on assessing community benefits including an examination of the new Schedule H of the IRS 990 form. Ancillary instructor materials for the Seventh Edition have been significantly expanded and updated. PowerPoint lecture slides now include selected examples from the chapters. Electronic versions of many of the charts and tables in the chapters are provided to enable the instructor to re-create and modify existing examples. An expanded set of test questions with detailed answers will be provided for each chapter. New excel spreadsheets for selected chapters will be created to help both the students and the instructors perform a variety of financial analysis tasks with spreadsheet templates. The instructor's manual has been revised to include key learning points, chapter overviews, and guidelines for class discussion.

Developing Intelligent Agent Systems - Lin Padgham 2005-06-24

Build your own intelligent agent system... Intelligent agent technology is a tool of modern computer science that can be used to engineer complex computer programmes that behave rationally in dynamic and changing environments. Applications range from small programmes that intelligently search the Web

buying and selling goods via electronic commerce, to autonomous space probes. This powerful technology is not widely used, however, as developing intelligent agent software requires high levels of training and skill. The authors of this book have developed and tested a methodology and tools for developing intelligent agent systems. With this methodology (Prometheus) developers can start agent-oriented designs and implementations easily from scratch saving valuable time and resources. Developing Intelligent Agent Systems not only answers the questions "what are agents?" and "why are they useful?" but also the crucial question: "how do I design and build intelligent agent systems?" The book covers everything a practitioner needs to know to begin to effectively use this technology - including an introduction to the notion of agents, a description of the concepts involved, and a software engineering methodology. Read on for: a practical step-by-step introduction to designing and building intelligent agent systems. a full life-cycle methodology for developing intelligent agent systems covering specification, analysis, design and implementation of agents. PDT: Prometheus Design Tool - software support for the Prometheus design process. the example of an electronic bookstore to illustrate the design process throughout the book. Electronic resources including the Prometheus Design Tool (PDT), can be found at:

<http://www.cs.rmit.edu.au/agents/prometheus> This book is aimed at industrial software developers, software engineers and at advanced undergraduate students. It assumes knowledge of basic software engineering but does not require knowledge of Artificial Intelligence or of mathematics. Familiarity with Java will help in reading the examples in chapter 10.

City, Street and Citizen - Suzanne Hall 2012-06-25

How can we learn from a multicultural society if we don't know how to recognise it? The contemporary city is more than ever a space for the intense convergence of diverse individuals who shift in and out of its urban terrains. The city street is perhaps the most prosaic of the city's public parts, allowing us a view of the very ordinary practices of life and livelihoods. By attending to the expressions of conviviality and contestation, 'City, Street and Citizen' offers an alternative notion of 'multiculturalism' away from the ideological frame of nation, and away from the moral imperative of community. This book offers to the reader an account of the lived realities of allegiance, participation and belonging from the base of a multi-ethnic street in south London. 'City, Street and Citizen' focuses on the question of whether local life is significant for how individuals develop skills to live with urban change and cultural and ethnic diversity. To animate this question, Hall has turned to a city street and its dimensions of regularity and propinquity to explore interactions in the small shop spaces along the Walworth Road. The city street constitutes exchange, and as such it provides us with a useful space to consider the broader social and political significance of contact in the day-to-day life of multicultural cities. Grounded in an ethnographic approach, this book will be of interest to academics and students in the fields of sociology, global urbanisation, migration and ethnicity as well as being relevant to politicians, policy makers, urban designers and architects involved in cultural diversity, public space and street based economies.

Every Time a Bell Rings - Barbara Ankrum 2019-11-18

Once upon a time, he was everything to her, except for one thing: her future Christmas sparkles from every bough and window at the cozy Four Winds Ski Resort, where single mother Eden Kendall and her eight-year-old son are spending the holiday. A surprise marriage proposal from her boss's son wasn't on her Christmas list, but it's the perfect excuse to get away and weigh her options. She never imagined her son's ski instructor/Santa impersonator would be the gorgeous, charismatic dreamer she left behind years ago, the one who still owns a piece of her heart. Cole Hagan has never stopped loving Eden and he's spent the last eight years proving her wrong on every count about his potential. While he fights to save the resort that he helped to build by organizing a holiday concert, he decides it's about time that Eden puts aside her list-making pragmatism so that she and her skeptical son can experience the true magic of Christmas. Can a not-so-perfect angel help this unlikely pair get a second chance at happily ever after?
