About Twenty Thousand Leagues Under The Sea Twenty Thousand Leagues Under the Sea (French: Vingt mille lieues sous les mers: Tour du monde sous-marin, literally Twenty Thousand Leagues Under the Seas: An Underwater Tour of the World) is a classic science fiction novel by French writer Jules Verne published in 1870. The novel was originally serialized from March 1869 through June 1870 in Pierre-Jules Hetzel's periodical, the Magasin d'Éducation et de Récréation. The deluxe illustrated edition, published by Hetzel in November 1871, included 111 illustrations by Alphonse de Neuville and Édouard Riou. The book was highly acclaimed when released and still is now; it is regarded as one of the premiere adventure novels and one of Verne's greatest works, along with Around the World in Eighty Days and Journey to the

Center of the Earth. The description of Nemo's ship, called the Nautilus, was considered ahead of its time, as it accurately describes features on submarines, which at the time were very primitive vessels. Thus, the book has been able to age well because of its scientific theories, unlike some of Verne's other works, like Journey to the Center of the Earth, which are not scientifically accurate and serve more simply as adventure novels.

### **Journey to the Centre of the Earth** - Jules Verne 2013

In Journey to the Centre of the Earth, an obsessive German professor and his nephew travel towards the earth's core in the steps of a medieval explorer beneath an Icelandic volcano where they discover a lost world. Twenty Thousand Leagues Under the Sea is famous for its portrayal of the Byronic Captain Nemo and his submarine, the Nautilus, in

which he explores the ocean while wreaking vengeance on mankind for their wickedness. In *Around the World in Eighty Days*, a starchy Englishman suspected of robbing the Bank of England accepts a bet that he cannot circumnavigate the globe in that time, and proceeds to do so, accompanied by his resourceful valet, Passepartout. The three novels combine fantasy and rich local colour with true learning and cod science in a mixture which attracts readers of all ages.

This is the story of an Underwater Tour of the World and is a classic science fiction novel by French writer Jules Verne. It tells the story of Captain Nemo and his submarine Nautilus, as seen from the perspective of Professor Pierre Aronnax after he, his servant Conseil, and Canadian whaler Ned Land are brought aboard the submarine, called the Nautilus, where they

meet the mysterious Captain Nemo. Their status on the ship seems ambiguous. Are they guests, as Nemo insists, or prisoners, as Ned Land begins to suspect? Nemo introduces them to the wonders of the underwater world. He shows them the lost continent of Atlantis and the wrecks he has plundered of gold as well as many other wonders.

*Journey to the Center of the Earth, Twenty Thousand Leagues Under the Sea, Round the World in Eighty Days* - Jules Verne 2013-10-01

Jules Verne's most beloved novels are gathered here in one hardcover volume: three thrilling tales of fabulous journeys under, through, and around the earth. Verne was one of the great pioneers of science fiction. Born in France in 1828, he wrote brilliantly about space, air, and underwater travel long before airplanes and space ships had been invented, and he is still one of the most widely read internationally of all science-fiction writers. But beyond charting new territory for adventurous fiction, his creations have entered our culture and taken on the magnitude and vitality of myth. It is hard to imagine anyone who has not heard of Captain Nemo and his giant submarine exploring the ruins of Atlantis in *Twenty Thousand Leagues Under the Sea*, Phileas Fogg's frantic race around the world by every means of

transportation in Round the World in Eighty Days, and the harrowing descent through a volcanic crater to underground caverns where prehistoric creatures roam in Journey to the Center of the Earth. These stories have seized the imaginations of readers for generations and are as vivid and exciting now as when their author first imagined traveling beyond the bounds of the possible. 20,000 Leagues Under the Sea  
- Jules Verne 2018-02-04

A large number of ships sailing the ocean had encountered a particular object-endlessly long, shaped like a spindle and much larger and faster than even the biggest whale. It was even reported to glow! A strange marine object captures the attention of the world. Professor Pierre Arronax and his loyal servant Conseil board the Abraham Lincoln in order to hunt down this creature. There they meet the famous harpooner Ned Land. They are accidentally flung off the ship and find each other in the open sea. They desperately grasp hold of the same creature they were hunting and find it to be a submarine. The three men are then captured and brought inside the vessel, where they meet its enigmatic creator and commander, Captain Nemo. How do they survive? What adventures do they face when they are on the vessel? Read on to find out.

**Twenty Thousand Leagues Under the Sea** - Jules Verne  
2020-09-28

The year 1866 was signalised by a remarkable incident, a

mysterious and puzzling phenomenon, which doubtless no one has yet forgotten. Not to mention rumours which agitated the maritime population and excited the public mind, even in the interior of continents, seafaring men were particularly excited. Merchants, common sailors, captains of vessels, skippers, both of Europe and America, naval officers of all countries, and the Governments of several States on the two continents, were deeply interested in the matter. For some time past vessels had been met by "an enormous thing," a long object, spindle-shaped, occasionally phosphorescent, and infinitely larger and more rapid in its movements than a whale. The facts relating to this apparition (entered in various log-books) agreed in most respects as to the shape of the object or creature in question, the untiring rapidity of its movements, its surprising power of locomotion, and the peculiar life with which it seemed endowed. If it was a

whale, it surpassed in size all those hitherto classified in science. Taking into consideration the mean of observations made at divers times—rejecting the timid estimate of those who assigned to this object a length of two hundred feet, equally with the exaggerated opinions which set it down as a mile in width and three in length—we might fairly conclude that this mysterious being surpassed greatly all dimensions admitted by the learned ones of the day, if it existed at all. And that it DID exist was an undeniable fact; and, with that tendency which disposes the human mind in favour of the marvellous, we can understand the excitement produced in the entire world by this supernatural apparition. As to classing it in the list of fables, the idea was out of the question. On the 20th of July, 1866, the steamer Governor Higginson, of the Calcutta and Burnach Steam Navigation Company, had met this moving mass five miles off the east coast of Australia. Captain

Baker thought at first that he was in the presence of an unknown sandbank; he even prepared to determine its exact position when two columns of water, projected by the mysterious object, shot with a hissing noise a hundred and fifty feet up into the air. Now, unless the sandbank had been submitted to the intermittent eruption of a geyser, the Governor Higginson had to do neither more nor less than with an aquatic mammal, unknown till then, which threw up from its blow-holes columns of water mixed with air and vapour.

Similar facts were observed on the 23rd of July in the same year, in the Pacific Ocean, by the Columbus, of the West India and Pacific Steam Navigation Company. But this extraordinary creature could transport itself from one place to another with surprising velocity; as, in an interval of three days, the Governor Higginson and the Columbus had observed it at two different points of the chart, separated by a distance of more than seven hundred nautical

leagues.

### **The Best of Jules Verne** - Jules Verne 2016-06-14

Four iconic novels of adventure, science, and fantasy from a master storyteller far ahead of his time. In *Twenty Thousand Leagues Under the Sea*, a monster wreaks havoc in the waters of the Atlantic Ocean. The US government sends a French marine biologist, his servant, and a Canadian harpoonist to take care of the problem. But instead of a mythic beast, the team finds the submarine

Nautilus and its fearsome helmsman, Captain Nemo. Around the World in Eighty Days follows Phileas Fogg and his eccentric manservant, Passepartout, on an epic quest to circumnavigate the globe. Pursued by a Scotland Yard detective, derailed by a herd of bison, and attacked by Sioux Indians, the travelers use every mode of transportation possible to race from one exotic exploit to the next. From the sands of Egypt to the icy waters of the Pacific, Fogg and Passepartout never lose sight of their goal—even when they stop to rescue a beautiful damsel in distress. Journey to the Center of the Earth is a cornerstone of science fiction and one of the greatest stories ever told. A dirty slip of parchment paper falls from the pages of an ancient manuscript. Deciphered by the indefatigable Otto Liedenbrock, professor of geology, and his reluctant nephew, Axel, the parchment's coded message asserts that a volcano in Iceland contains a passageway to the center of

the earth. Two days later, the adventurers embark on a journey so fantastic it will alter the very meaning of history. In The Mysterious Island, a hot air balloon hijacked by captured Union army soldiers is blown far, far away from its point of departure in Richmond, Virginia. When the craft crash-lands on an island in the South Pacific, the prisoners must contend with wild animals, pirates, and an active volcano—in a fight for their very survival. Twenty Thousand (20,000) Leagues Under the Sea (French: Vingt mille lieues sous les mers) is a classic science fiction novel by French writer Jules Verne published in 1870.

It tells the story of Captain Nemo and his submarine Nautilus as seen from the perspective of Professor Pierre Aronnax. As the story begins in 1866, a mysterious sea monster, theorized by some to be a giant narwhal, is sighted by ships of several nations; an ocean liner is also damaged by the creature. The United States government finally assembles an expedition in New York City to track down and destroy the menace. Professor Pierre Aronnax, a noted French marine biologist and narrator of the story, who happens to be in New York at the time and is a recognized expert in his field, is issued a last-minute invitation to join the expedition, and he accepts. This ebook edition contains all 70 original illustrations by Alphonse de Neuville and Édouard Riou.

*Off On a Comet* - Jules Verne 2021-01-26

Off on a Comet is a high-stakes adventure novel and is included in Jules Verne's celebrated Voyages Extraordinaire series. When the orbit of a comet named Gallia is headed towards the Earth, the planet is facing a very high risk. However, Gallia only touches a small part of the Earth, sparing most of the world, but taking a small region of the planet with it on its journey through space. Thirty-six people, spanning from French, English, Spanish and Russian origins, live on this territory that Gallia has stolen, though they have no idea what has happened. Assuming that the impact was just an earthquake, the people in this territory do not realize that they have left Earth. Slowly, they begin to notice odd happenstances such as weight loss, the ability to jump higher, the short alternation between day and night, flipped compasses, and a new boiling point for water. As each community discovers these changes, the French, English, Spanish, and the Russians all

band together to conduct a research expedition, sailing around the seas of their world. When their expeditions prove their suspicions, the group understand their situation more fully, and find out that the comet Gallia is headed back to Earth. However, as old power disputes arise between the nations, they are divided when they must work together to prepare themselves to survive the collision. With complex characters and the fascinating setting of space, Off on a Comet is a thrilling adventure that allows its audience to explore the mysterious realm of space. Included in Jules Verne's outstanding series, Voyage Extraordinaire, Off on a Comet promises a high stakes adventure, paired with the triumphs and downfalls of humankind as they struggle to work together. Though Off on a Comet was originally published nearly one-hundred and forty-five years ago, this Jules Verne novel continues to delight modern audiences with its unique premise and intriguing

setting. This edition of *Off on a Comet* by Jules Verne is now available with a stunning new cover design and is printed in a font that is both modern and readable.

### **The Complete Twenty Thousand Leagues Under the Sea** - Jules Verne 1991

When an unidentified monster threatens international shipping, French oceanographer Pierre Aronnax and his unflappable assistant Conseil join an expedition organized by the US Navy to hunt down and destroy the menace. After months of fruitless searching, they finally grapple with their quarry, but Aronnax, Conseil, and the brash Canadian harpooner Ned Land are thrown overboard in the attack, only to find that the monster is actually a futuristic submarine, the *Nautilus*, commanded by a shadowy, mystical, preternaturally imposing man who calls himself Captain Nemo. Thus begins a journey of 20,000 leagues - nearly 50,000 miles - that will take Captain Nemo, his crew, and these three

adventurers on a journey of discovery through undersea forests, coral graveyards, miles-deep trenches, and even the sunken ruins of Atlantis. Jules Verne's novel of undersea exploration has been captivating readers ever since its first publication in 1870.

### **Twenty Thousand Leagues Under the Seas** - Jules Verne 2019-04-18

"I am going to sink it." "You are not!" "I am," he coldly replied. "Do not take it on yourself to judge me, monsieur." French naturalist Dr Aronnax embarks on an expedition to hunt down a sea monster, but discovers instead the *Nautilus*, a self-contained world built by its enigmatic captain. Together Nemo and Aronnax explore the underwater realms of the globe, undergo a transcendental experience

amongst the ruins of Atlantis, and plant a black flag at the South Pole. Nemo's mission is finally revealed to be a violent one-and his methods coldly efficient. Verne's classic novel has left a profound mark on subsequent centuries. Its themes are universal, its style alternately humorous and grandiose, its construction masterly. This new and unabridged translation brilliantly conveys the range of this seminal work. The volume also contains unpublished information about the novel's inception.

Twenty Thousand Leagues Under the Sea - Jules Verne  
2018-03

A mission to rid the seas of a monstrous creature becomes a terrifying nightmare when Professor Aronnax, Conseil and

Ned Land are thrown overboard. The huge marine animal which has haunted the water is no living beast, but a spectacular man-made vessel, and the three men find themselves the helpless prisoners of Captain Nemo. Resigned to their fate, they begin a miraculous journey on the submarine ship which can travel through waters never before explored. For the Professor, at least, this voyage is one he would not have missed for the world.
