The Archaeology of Egypt in the Third Intermediate Period - James E. Bennett 2019-09-26

This book is aimed at students, teachers, and academics who have an interest in the study of urbanism in Egypt and the ancient world. This book provides for the first time, an up-to-date, comprehensive analysis of Egyptian urbanism during the Third Intermediate Period (1076-664 BCE).

Triangular Landscapes - Katherine Blouin 2014

Using papyri and other sources documenting the Mendesian Nome, a district of the North-Eastern Nile Delta, this volume investigates the complex networks of relationships between Mendesian environments, socio-economic dynamics, and agro-fiscal policies in the Roman period.

Les villes de Basse Égypte au Ier millénaire av. J.-C. - François Leclère 2008

La multiplication récente des interventions archéologiques sur les sites urbains de la Vallée du Nil a considérablement fait progresser la connaissance de l'histoire des villes antiques. À partir des informations recueillies, tant textuelles qu'archéologiques, et en dépit de la forte

disparité des données, liée aux conditions inégales de conservation et d'exploration des sites, il nous a paru possible d'envisager une étude des caractères morphologiques des agglomérations dans un cadre chronologique et géographique restreint, celui de la Basse Égypte au Ier millénaire av. J.-C. Notre objectif était de dégager des principes généraux et récurrents d'organisation de l'espace urbain et de repérer une évolution éventuelle de cet ordre spatial. La majeure partie de l'ouvrage présente un choix de dossiers monographiques, une douzaine de villes de Basse Égypte fondées ou occupées durant le Ier millénaire av. J.-C.: Memphis, Saïs, Bouto, Athribis, Diospolis d'aval, Mendès/Thmouis, Boubastis, Bouto d'Arabie, Tanis, Naukratis, Daphnae des Palus et Héroonpolis/Pithom. Une synthèse intègre ces études locales dans une perspective plus large et transversale. Après avoir défini les limites de la documentation et de son interprétation et procédé à une analyse comparative des caractéristiques des sites, nous avons pu montrer en quoi la relation entre les aires sacrées et les secteurs profanes dont sont étudiés les éléments-types était à l'origine d'une organisation spatiale interne. Des aménagements spécifiques à cette époque ont ainsi pu être mis en évidence : agrandissement des sanctuaires, extension des espaces sacrés au détriment des quartiers civils, introduction de tombes royales ou princières à l'intérieur de

l'espace sécurisé par les enceintes de temples ou à proximité, occupations illicites des enclos religieux

The Delta Survey, 2009-2015 - Jeffrey Spencer 2016-06-01

This volume presents the results of recent explorations carried out by Jeffrey and Patricia Spencer for the Egypt Exploration Society's Delta Survey. The sites considered here were identified in the course of preliminary inspections to possess some features worthy of additional investigation by magnetometer survey or by limited excavation.

Roman Egypt - Roger S. Bagnall 2021-08-31

Egypt played a crucial role in the Roman Empire for seven centuries. It was wealthy and occupied a strategic position between the Mediterranean and Indian Ocean worlds, while its uniquely fertile lands

helped to feed the imperial capitals at Rome and then Constantinople. The cultural and religious landscape of Egypt today owes much to developments during the Roman period, including in particular the forms taken by Egyptian Christianity. Moreover, we have an abundance of sources for its history during this time, especially because of the recovery of vast numbers of written texts giving an almost uniquely detailed picture of its society, economy, government, and culture. This book, the work of six historians and archaeologists from Egypt, the US, and the UK, provides students and a general audience with a readable new history of the period and includes many illustrations of art, archaeological sites, and documents, and quotations from primary sources.

The Great Portico at Hermopolis Magna - Steven R. Snape 1988

Kom el-Hisn (ca. 2500-1900 BC) - Anthony J. Cagle 2016-09-30
This volume presents the findings of three seasons of excavation in the 1980s at Kom el-Hisn, "the mound of the fortress," in the northwest Nile Delta. This provincial community was often in the orbit of Memphis, the capital and administrative center of Egypt's Old Kingdom period. Small areas of occupations of the First Intermediate and early Middle Kingdom periods were also excavated. One of the goals of the excavations was to complement and compare the substantial ancient textual record of this era with Kom el-Hisn's archaeological record because such evidence is sparse for Lower Egypt between about 2500 and 1800 BC. The findings presented here reveal the complexity of small Old Kingdom settlements in the context of the Memphite state organization and shed light on the changing relationships of this administrative center with its provincial communities. Kom el-Hisn's faunal, floral, lithic, and architectural remains are presented and discussed in detail, as are some theoretical and methodological issues relevant to this research. With contributions by Paul E. Buck, Anthony J. Cagle, Michal Kobusiewicz, Karla Kroeper, Richard R. Redding, Sarah Sterling, Robert J. Wenke, Wilma Wetterstrom, Anna Wodzinska, and Alexandra Witsell.

Herrschaftsräume und Herrschaftswissen ägyptischer Lokalregenten - Jan Moje 2013-12-18

Im 8. Jh. v. Chr. erlangten in Ägypten lokale Machthaber immer mehr Einfluss gegenüber der Zentralregierung und herrschten schließlich nahezu eigenständig über ihre Machträume. Dieses Werk versammelt erstmalig alle hierzu bekannten Quellen, die hinsichtlich ihrer Aussagekraft über die soziokulturellen Interaktionen mit König und Lokalbevölkerung analysiert werden. Herausgearbeitet wird dabei das angewendete Herrschaftswissen zum Zwecke der eigenen Machtkonsolidierung und die darin erkennbaren Raum-Wissens-Beziehungen der Potentaten.

The Oxford Handbook of Roman Egypt - Christina Riggs 2012-06-21
Roman Egypt is a critical area of interdisciplinary research, which has steadily expanded since the 1970s and continues to grow. Egypt played a pivotal role in the Roman empire, not only in terms of political, economic, and military strategies, but also as part of an intricate cultural discourse involving themes that resonate today - east and west, old world and new, acculturation and shifting identities, patterns of language use and religious belief, and the management of agriculture and trade. Roman Egypt was a literal and figurative crossroads shaped by the movement of people, goods, and ideas, and framed by permeable boundaries of self and space. This handbook is unique in drawing together many different strands of research on Roman Egypt, in order to suggest both the state of knowledge in the field and the possibilities for collaborative, synthetic, and interpretive research. Arranged in seven thematic sections, each of which includes essays from a variety of disciplinary vantage points and multiple sources of information, it offers new perspectives from both established and younger scholars, featuring individual essay topics, themes, and intellectual juxtapositions.

Hellenistic and Roman Egypt - Roger S. Bagnall 2006

This second collection by Roger Bagnall brings together a further two dozen of his studies, this time covering Hellenistic, Roman, and Byzantine Egypt, published over the last thirty years. Many of the articles deal with issues of historical and papyrological method: the restoration of papyrus texts, the direction of archaeological work in Egypt, economic models for Roman Egypt, the usefulness of postcolonial

theory, and approaches to the defective literary tradition for the Library of Alexandria. Others concentrate on particular bodies of evidence, ranging from inscriptions to ascetic literature, from registers to women's letters.

Tell Dafana Reconsidered - François Leclère 2014

This book considers the relationship between Egypt and Archaic Greece from the 7th to 5th century BC through a re-assessment of the site of ancient Daphnae (now known as Tell Dafana) in the Nile Delta of Egypt. - Back cover.

Afterglow of Empire - Aidan Dodson 2019-11-05

During the half-millennium from the eleventh through the sixth centuries BC, the power and the glory of the imperial pharaohs of the New Kingdom crumbled in the face of internal crises and external pressures, ultimately reversed by invaders from Nubia and consolidated by natives

of the Nile Delta following a series of Assyrian invasions. Much of this era remains obscure, with little consensus among Egyptologists. Against this background, Aidan Dodson reconsiders the evidence and proposes a number of new solutions to the problems of the period. He also considers the era's art, architecture, and archaeology, including the royal tombs of Tanis, one of which yielded the intact burials of no fewer than five pharaohs. *Afterglow of Empire* is extensively illustrated with images of this material, much of which is little known to non-specialists. By the author of the bestselling *Amarna Sunset* and *Poisoned Legacy*.

Dakhleh Oasis and the Western Desert of Egypt under the Ptolemies - James C. R. Gill 2016-07-08

Through an analysis of recently discovered Ptolemaic pottery from Mut al-Kharab, as well as a reexamination of pottery collected by the Dakhleh Oasis Project during the survey of the oasis from 1978-1987, this book challenges the common perception that Dakhleh Oasis experienced a sudden increase in agricultural exploitation and a dramatic rise in population during the Roman Period. It argues that such changes had already begun to take place during the Ptolemaic Period, likely as the result of a deliberate strategy directed toward this region by the Ptolemies. This book focuses on the ceramic remains in order to determine the extent of Ptolemaic settlement in the oases and to offer new insights into the nature of this settlement. It presents a corpus of Ptolemaic pottery and a catalogue of Ptolemaic sites from Dakhleh Oasis. It also presents a survey of Ptolemaic evidence from the oases of Kharga, Farafra, Bahariya and Siwa. It thus represents the first major synthesis of Ptolemaic Period activity in the Egyptian Western Desert.

The Oxford Handbook of Ancient Greek Religion - Esther Eidinow
2015

This handbook offers both students and teachers of ancient Greek religion a comprehensive overview of the current state of scholarship in the subject, from the Archaic to the Hellenistic periods. It not only presents key information, but also explores the ways in which such

information is gathered and the different approaches that have shaped the area. In doing so, the volume provides a crucial research and orientation tool for students of the ancient world, and also makes a vital contribution to the key debates surrounding the conceptualization of ancient Greek religion. The handbook's initial chapters lay out the key dimensions of ancient Greek religion, approaches to evidence, and the representations of myths. The following chapters discuss the continuities and differences between religious practices in different cultures, including Egypt, the Near East, the Black Sea, and Bactria and India. The range of contributions emphasizes the diversity of relationships between mortals and the supernatural - in all their manifestations, across, between, and beyond ancient Greek cultures - and draws attention to religious activities as dynamic, highlighting how they changed over time, place, and context.

Science in the Study of Ancient Egypt - Sonia Zakrzewski 2015-12-22

Science in the Study of Ancient Egypt takes an innovative and integrated approach to the use of scientific techniques and methodologies within the study of ancient Egypt. Accessibly demonstrating how to integrate scientific methodologies into Egyptology broadly, and in Egyptian archaeology in particular, this volume will help to maximise the amount of information that can be obtained within a study of ancient Egypt, be it in the field, museum, or laboratory. Using a range of case studies which exemplify best practice within Egyptian archaeological science, Science in the Study of Ancient Egypt presents both the scientific methods of analysis available and their potential applications to Egyptologists. Although Egyptology has mainly shown a marked lack of engagement with recent archaeological science, the authors illustrate the inclusive but varied nature of the scientific archaeology which is now being undertaken, demonstrating how new analytical techniques can develop greater understanding of Egyptian data.

Greco et Romains en Égypte - Pascale Ballet 2012

Egypt of the Saite pharaohs, 664-525 BC - Roger Forshaw 2019-05-22

In the 660s BC Egypt was a politically fragmented and occupied country. However, this was to change when a family of local rulers from the city of Sais declared independence from the Assyrian Empire, and in a few short years succeeded in bringing about the reunification of Egypt. The Saites established central government, reformed the economy and promoted trade. The country became prosperous, achieving a pre-eminent role in the Mediterranean world. This is the first monograph devoted entirely to a detailed exploration of the Saite Dynasty. It reveals the dynamic nature of the period, the astuteness of the Saite rulers and their considerable achievements in the political, economic,

administrative and cultural spheres. It will appeal not only to students of Egyptology but also, because of the interactions of the Saite Dynasty with the Aegean and Mesopotamia worlds, to anyone interested in ancient history.

Catalogue of the Terracottas in the British Museum - British Museum. Department of Greek and Roman Antiquities 2008

This, the fourth in the British Museum's series of terracottas catalogues, features terracottas found in Egypt and dating from the victory of Alexander in 332 BC and the succeeding Ptolemaic and Roman periods until the Arab conquest in AD 641. The typical terracottas of the Ptolemaic and Roman periods, in all their exuberant variety, are known mainly from catalogues of unprovenanced material and not much is known of their chronology. No doubt purchased by both Greek and Egyptian members of the population, most such terracottas most probably came predominantly from the houses of city- and village-

dwellers, and, placed in a house-shrine, would have been thought by their owners to have a protective function over their households in everyday life and in childbirth. They would also enhance the fertility of fields and animals. Some 830 terracottas and objects, arranged thematically, are discussed and illustrated. The introduction describes the scope and content of the material; its function and distribution within the villages and cities of Egypt; its religious context; the difficulties of dating it; and manufacturing techniques.
