The TESOL Research Training Journey - Shen Chen 2021-04-05

Research training is challenging, and the attrition rate of doctoral students has been increasing in Canada, the UK, the USA and Australia. In their book, Chen and Le examine the reasons for these students becoming demotivated, particularly in the context of TESOL. There has been much investigation into research training issues in multiple contexts and multiple disciplines. Yet, the research training process in TESOL for international students has not been explored sufficiently, and their voices have not been heard. This book gives voice to the research trainees, allowing their experiences to be reflected and the implications discussed in order to help create more effective supervision models. By employing the qualitative approach and adopting critical incident as a new technique for data collection, Chen and Le attempt to gain insights into the research training process to reveal different research stages of research trainees—those undertaking PhD degrees—and to put forward a model of supervision to improve the

innovation and quality of research. This book tackles the complex nature of research training. It is hoped that findings of this study can provide research supervisors and trainees with theoretical insights and practical references.

Intercultural Communication - Tracy Novinger 2013-05-01

Successfully communicating with people from another culture requires learning more than just their language. While fumbling a word or phrase may cause embarrassment, breaking the unspoken cultural rules that govern personal interactions can spell disaster for businesspeople, travelers, and indeed anyone who communicates across cultural boundaries. To help you avoid such damaging gaffes, Tracy Novinger has compiled this authoritative, practical guide for deciphering and following "the rules" that govern cultures, demonstrating how these rules apply to the communication issues that exist between the United States and Mexico. Novinger begins by explaining how a major proportion of communication within a culture occurs nonverbally through behavior and manners, shared attitudes, common expectations, and so on. Then, using real-life examples and anecdotes, she pinpoints the commonly occurring obstacles to communication that can arise when cultures differ in their communication techniques. She shows how these obstacles come into play in contacts between the U.S. and Mexico and demonstrates that mastering the unspoken rules of Mexican culture is a key to cementing business and social relationships. Novinger concludes with nine effective, reliable principles for successfully communicating across cultures.

The authors raise points of critical reflection on intercultural events and issues in various areas of communication including health, work, environment and education. The book also covers a range of issues, from the interactions of various cultures to the expansion of social organizations and the growing global infrastructure. By integrating 'glocal' perspectives in intercultural communication, the book addresses the long-term strategy of developing a global community without sacrificing indigenous local values.

China's Ambassadors of Christ to the Nations - Tabor Laughlin 2020-03-24

Maybe you are familiar with the growth in recent decades of "majority world" missionaries being sent all over the world from non-Western countries (i.e., countries in Asia, Africa, Latin America, Middle East). This book focuses on missionaries sent from one non-Western country, analyzing the experiences of Chinese missionaries on the mission field. The missionaries interviewed were sent from house churches in mainland China, have served overseas for at least two years, and are ministering cross-culturally to non-Chinese on the mission field. The first research question relates to Chinese missionaries' successes and difficulties in cross-culturally building relationships with locals, learning the local language, and adjusting to the local culture. The second research question analyzes factors that have contributed to the Chinese missionaries remaining on the mission field. This included how pre-field preparation and on-field support contributed to their retention. Also analyzed were other challenges and needs the missionaries had on the field. The interviewees were serving in countries in Central Asia, Southeast Asia, and the Middle East.

Student Learning Abroad - Michael Vande Berg 2012-10-29

A central purpose of this book is to question the claims commonly made about the educational benefits of study abroad. Traditional metrics of enrollment increases and student self-report, and practices of structural immersion, are being questioned as educators voice growing uncertainty about what students are or are not in fact learning abroad. This book looks into whether these criticisms are justified—and what can be done if they are. The contributors to this book offer a counter-narrative to common views that learning takes place simply through students studying elsewhere, or through their enrolling in programs that take steps structurally to "immerse" them in the experience abroad. *Student Learning Abroad* reviews the dominant paradigms of study abroad; marshals rigorous research findings, with emphasis on recent studies that offer convincing evidence about what undergraduates are or are not learning; brings to bear the latest knowledge about human learning and development that raises questions about the very foundations of current theory and practice; and presents six examples of study abroad courses or programs whose interventions apply this knowledge. This book provokes readers to reconsider long-held assumptions, beliefs and practices about teaching and learning in study abroad and to reexamine the design and delivery of their programs. In doing so, it provides a new foundation for responding to the question that may faculty and staff are now asking: What do I need to know, and what do I need to be able to do, to help my students learn and develop more effectively abroad? Michael Paige (2007) and Michael Vande Berg (2012) are recipients of the Forum on Education Abroad's Peter A. Wollitzer Award.

Teaching of Culture in English as an International Language - Shen Chen 2018-08-06

The importance of integrating the teaching and learning of language and culture has been widely recognised and emphasized. However, how to teach English as an International Language (EIL) and cultures in an integrative way in non-native English speaking countries remains problematic and has largely failed to enable language learners to meet local and global communication demands. Developing students' intercultural competence is one of the key missions of teaching cultures. This book examines a range of well-established models and paradigms from both English-speaking and non-English speaking countries. Exploring questions of why, what, and how to best teach cultures, the authors propose an integrated model

to suit non-native English contexts in the Asia Pacific. The chapters deal with other critical issues such as the relationship between language and power, the importance of power relations in communication, the relationship between teaching cultures and national interests, and balancing tradition and change in the era of globalisation. The book will be valuable to academics and students of foreign language education, particularly those teaching English as an international language in non-native English countries.

Handbook of Intercultural Communication and Cooperation - Alexander Thomas 2010

Intercultural competence and collaboration with individuals from diverse national origins are today important skills. This handbook comprehends an overall strategic concept for interculturality in

corporations. The ability to communicate with people from diverse cultural backgrounds is becoming increasingly important. Many employers consider intercultural competence to be a key criterion for selecting qualified candidates. The authors discuss practical approaches for intercultural trainings, methodology, and evaluation procedures based on current research. They explore the intercultural factor within corporations particularly as it relates to human resource development, negotiating, dealing with conflict, and project management. Thoughts on developing an overall strategy for interculturality round off this handbook.
