

Practicing Law In The Sharing Economy Helping People Build Cooperatives Social Enterprise And Local Sustainable Economies

When somebody should go to the books stores, search creation by shop, shelf by shelf, it is really problematic. This is why we present the books compilations in this website. It will unquestionably ease you to look guide **Practicing Law In The Sharing Economy Helping People Build Cooperatives Social Enterprise And Local Sustainable Economies** as you such as.

By searching the title, publisher, or authors of guide you in fact want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be every best area within net connections. If you endeavor to download and install the Practicing Law In The Sharing Economy Helping People Build Cooperatives Social Enterprise And Local Sustainable Economies , it is definitely easy then, previously currently we extend the connect to buy and create bargains to download and install Practicing Law In The Sharing Economy Helping People Build Cooperatives Social Enterprise And Local Sustainable Economies suitably simple!

Practicing Law in the Sharing Economy - Janelle Orsi 2012

Theorizing the Sharing Economy - Indre Maurer 2020-04-10

This volume takes advantage of this opportunity by presenting a collection of empirical and conceptual work that explores the variety and the trajectories of new forms of organizing in the sharing economy, and in doing so builds on, rejuvenates, and refines existing organization theories.

A New American Labor Movement - William E. Scheuerman 2021-10-01

Describes how new kinds of direct-action labor movements are emerging to reshape American labor activism in the twenty-first century. The American labor movement isn't dead. It's just moving from the bargaining table to the streets. In *A New American Labor Movement*, William Scheuerman analyzes how the decline of unions and the emergence of these new direct-action movements are reshaping the American labor movement. Tens of thousands of exploited workers—from farm laborers and gig drivers to freelance artists and restaurant workers—have taken to the streets in a collective attempt to attain a living wage and decent working conditions, with or without the help of unions. This new worker militancy, expressed through mass demonstrations, strikes, sit-ins, political action, and similar activities, has already achieved much success and offers models for workers to exercise their power in the twenty-first century. Finally, Scheuerman notes, many of the strategies of the new direct-action groups share features with the sectoral bargaining model that dominates the European labor movement, suggesting that sectoral bargaining may become the foundation of a new American labor movement. William E. Scheuerman is Professor Emeritus of Political Science at the State University of New York at Oswego. Prior to retiring as President of the National Labor College, he served as President of the United University Professions, the faculty and staff union at SUNY. He is currently Treasurer of the American Labor Studies Center. Scheuerman has authored several books, including *United University Professions: Pioneering in Higher Education Unionism* (with Nuala McGann Drescher and Ivan D. Steen), also published by SUNY Press.

The Cambridge Handbook of the Law of the Sharing Economy - John J. Infranca 2018-10-31

This Handbook grapples conceptually and practically with what the sharing economy - which includes entities ranging from large for-profit firms like Airbnb, Uber, Lyft, Taskrabbit, and Upwork to smaller, non-profit collaborative initiatives - means for law, and how law, in turn, is shaping critical aspects of the sharing economy. Featuring a diverse set of contributors from many academic disciplines and countries, the book compiles the most important, up-to-date research on the regulation of the sharing economy. The first part surveys the nature of the sharing economy, explores the central challenge of balancing innovation and regulatory concerns, and examines the institutions confronting these regulatory challenges, and the second part turns to a series of specific regulatory domains, including labor and employment law, consumer protection, tax, and civil rights. This groundbreaking work should be read by anyone interested in the dynamic relationship between law and the sharing economy.

Engaging Stakeholders in Education for Sustainable Development at University Level - Walter Leal Filho 2016-01-11

This book discusses the role of ESD stakeholders at university level, involving civil society and the private sector and public sectors (including local, national and intergovernmental bodies). In particular, it describes practical experiences, partnerships, networks, and training schemes for increasing the capacity of ESD and other initiatives aimed at promoting education for sustainable development taking place at institutions of higher education. In order to meet the pressing need for publications that may promote stakeholders' involvement in ESD in higher education, the book particularly focuses on state-of-the-art approaches, methods, initiatives and projects from around the world, illustrating the contribution of different stakeholder groups to sustainable development in higher education on an international scale.

Raising Dough - Elizabeth Ü 2013-06-13

More and more entrepreneurs are using food-based businesses to solve social and environmental problems - and yet the majority of them report that a lack of access to capital prevents them from launching, maintaining, or growing their ventures. *Raising Dough* is an unprecedented guide to the full range of financing options available to support sustainable food businesses. *Raising Dough* provides valuable insights into the world of finance, including: Descriptions of various capital options, including traditional debt and equity, government grant and loan programs, and cutting-edge models such as crowdfunding and community-based alternatives Guiding questions to help determine which capital options are the most appropriate given the size, stage, entity type, growth plans, mission, and values of an enterprise Case studies and testimonials highlighting the experiences of food system entrepreneurs who have been there before, including both success stories and cautionary tales Referrals to sources of capital, financiers, investor networks, and other financial resources. Written primarily for people managing socially responsible food businesses, the resources and tips covered in this book will benefit social entrepreneurs - and their investors - working in any sector.

The Great Awakening - Anna Gear 2020-10-08

The New Better Off - Courtney E. Martin 2016-10-04

Are we living the good life—and what defines 'good', anyway? Americans today are constructing a completely different framework for success than their parents' generation, using new metrics that TEDWomen speaker and columnist Courtney Martin has termed collectively the "New Better Off". *The New Better Off* puts a name to the American phenomenon of rejecting the traditional dream of a 9-to-5 job, home ownership, and a nuclear family structure—illuminating the alternate ways Americans are seeking happiness and success. Including commentary on recent changes in how we view work, customs and community, marriage, rituals, money, living arrangements, and spirituality, *The New Better Off* uses personal stories and social analysis to explore the trends shaping our country today. Martin covers growing topics such as freelancing, collaborative consumption, communal living, and the breaking down of gender roles. *The New Better Off* is about the creative choices individuals are making in their vocational and personal lives, but it's also about the movements, formal and informal, that are coalescing around the *New Better Off* idea—people who are reinventing the social safety net and figuring out how to truly better their

own communities.

The Sharing Economy - Maria Regina Redinha 2018-11-21

The sharing economy is just one of several possible expressions to designate the complex model of social and economic relationships based on the intensive use of digital technology. Constant permutations and combinations allow these relationships to be established through the intervention of a third party making traditional contractual positions flexible in such a way that today's employee is tomorrow's entrepreneur, or today's consumer is tomorrow's supplier of goods and services. The current legal framework is, in many respects, unable to accommodate such big changes and new legal regulations are required where adaptation of the existing ones proves to be inadequate. This book highlights where changes are needed and where adaptations are required, with a particular focus on the Portuguese, Spanish, Italian, British and Brazilian contexts. For that, four different approaches are undertaken, namely the meta-legal, macro-legal, micro-legal and transnational approaches. The study that results from these different approaches enables readers to acquire a general view on the current legal problems arising from the sharing economy, and was a direct result of a research project of the Centre for Legal and Economic Research, at the University of Porto, funded by Fundação para a Ciência e Tecnologia.

International Food Law and Policy - Gabriela Steier 2017-08-08

International Food Law and Policy is the first interdisciplinary piece of academic literature of its kind with a comprehensive, reader-friendly approach to teaching the major aspects of food regulation, law, policy, food safety and environmental sustainability in a global context. The sections are grouped by continents and focus on a range of cross-disciplinary subjects, such as public health, international food trade, the right to food, intellectual property and global regulatory aspects of food production. With its systematic approach, this book will be a valuable resource both for professionals working in food regulation and anyone interested in the subject. It provides a solid foundation for courses and master's programs in environmental management, food law, policy and regulation, and sustainable development around the world.

The Sharing Economy in Europe - Vida Česnuitytė 2022-01-21

This open access book considers the development of the sharing and collaborative economy with a European focus, mapping across economic sectors, and country-specific case studies. It looks at the roles the sharing economy plays in sharing and redistribution of goods and services across the population in order to maximise their functionality, monetary exchange, and other aspects important to societies. It also looks at the place of the sharing economy among various policies and how the contexts of public policies, legislation, digital platforms, and other infrastructure interrelate with the development and function of the sharing economy. The book will help in understanding the future (sharing) economy models as well as to contribute in solving questions of better access to resources and sustainable innovation in the context of degrowth and growing inequalities within and between societies. It will also provide a useful source for solutions to the big challenges of our times such as climate change, the loss of biodiversity, and recently the coronavirus disease pandemic (COVID-19). This book will be of interest to academics and students in economics and business, organisational studies, sociology, media and communication and computer science.

Legal Tech and the New Sharing Economy - Marcelo Corrales Compagnucci 2019-12-13

The exponential growth of disruptive technology is changing our world. The development of cloud computing, big data, the internet of things, artificial intelligence, machine learning, deep learning, and other related autonomous systems, such as self-driving vehicles, have triggered the emergence of new products and services. These significant technological breakthroughs have opened the door to new economic models such as the sharing and platform-based economy. As a result, companies are becoming increasingly data- and algorithm-driven, coming to be more like "decentralized platforms". New transaction or payment methods such as Bitcoin and Ethereum, based on trust-building systems using Blockchain, smart contracts, and other distributed ledger technology, also constitute an essential part of this new economic model. The sharing economy and digital platforms also include the everyday exchange of goods allowing individuals to commodify their surplus resources. Information and innovation technologies are used in order to then match these resources with existing demand in the market. Online platforms such as Airbnb, Uber, and Amazon reduce information asymmetry, increase the value of unused resources, and

create new opportunities for collaboration and innovation. Moreover, the sharing economy is playing a major role in the transition from exclusive ownership of personal assets toward access-based exploitation of resources. The success of online matching platforms depends not only on the reduction of search costs but also on the trustworthiness of platform operators. From a legal perspective, the uncertainties triggered by the emergence of a new digital reality are particularly urgent. How should these tendencies be reflected in legal systems in each jurisdiction? This book collects a series of contributions by leading scholars in the newly emerging fields of sharing economy and Legal Tech. The aim of the book is to enrich legal debates on the social, economic, and political meaning of these cutting-edge technologies. The chapters presented in this edition attempt to answer some of these lingering questions from the perspective of diverse legal backgrounds.

Regulating the Collaborative Economy in the European Union Digital Single Market - Marco Inglese 2019-11-11

This book critically assesses how the rise of the collaborative economy in the European Union Digital Single Market is disrupting consolidated legal acquisitions, such as classical internal market categories, as well as the applicability of consumer protection, data protection, and labour and competition law. It argues that the collaborative economy will, sooner or later, require some sort of regulatory intervention from the European Union. This regulatory intervention, far from stifling innovation, will benefit online platforms, service providers and users by providing them with a clearer and more predictable environment in which to conduct their business. Although primarily intended for academics, this book also appeals to a wider readership, including, but not limited to, national and international regulators, private firms and lobbies as well as online platforms, consumer associations and trade unions.

The Trouble With Sharing - Airi Lampinen 2022-05-31

Peer-to-peer exchange is a type of sharing that involves the transfer of valued resources, such as goods and services, among members of a local community and/or between parties who have not met before the exchange encounter. It involves online systems that allow strangers to exchange in ways that were previously confined to the realm of kinship and friendship. Through the examples in this book, we encounter attempts to foster the sharing of goods and services in local communities and consider the intricacies of sharing homes temporarily with strangers (also referred to as hospitality exchange or network hospitality). Some of the exchange arrangements discussed involve money while others explicitly ban participants from using it. All rely on digital technologies, but the trickiest challenges have more to do with social interaction than technical features. This book explores what makes peer-to-peer exchange challenging, with an emphasis on reciprocity, closeness, and participation: How should we reciprocate? How might we manage interactions with those we encounter to attain some closeness but not too much? What keeps people from getting involved or draws them into exchange activities that they would rather avoid? This book adds to the growing body of research on exchange platforms and the sharing economy. It provides empirical examples and conceptual grounding for thinking about interpersonal challenges in peer-to-peer exchange and the efforts that are required for exchange arrangements to flourish. It offers inspiration for how we might think and design differently to better understand and support the efforts of those involved in peer-to-peer exchange. While the issues cannot be simply "solved" by technology, it matters which digital tools an exchange arrangement relies on, and even seemingly small design decisions can have a significant impact on what it is like to participate in exchange processes. The technologies that support exchange arrangements—often platforms of some sort—can be driven by differing sets of values and commitments. This book invites students and scholars in the Human-Computer Interaction community, and beyond, to envision and design alternative exchange arrangements and future economies.

The Sharing Solution - Janelle Orsi 2009

Presents legal and practical methods to sharing resources, including automobiles, housing, and caregiving, and describes how sharing programs benefit the economy, community, and the environment.

The Collaborative Economy and EU Law - Vassilis Hatzopoulos 2018-02-22

'Disruptive innovation', 'the fourth industrial revolution', 'one of the ten ideas that will change the world'; the collaborative/sharing economy is shaking existing norms. It poses unprecedented challenges in terms of both material policies and governance in almost all aspects of EU law. This book explores the application -

or indeed inadequacy – of existing EU rules in the context of the collaborative economy. It analyses the novelties introduced by the collaborative economy and discusses the specific regulatory needs and instruments employed therein, most notably self-regulation. Further, it aims to elucidate the legal status of the parties involved (traders, consumers, prosumers) in these multi-sided economies, and their respective roles in the provision of services, especially with regard to liability issues. Moreover, it delves into a sector-specific examination of the relevant EU rules, especially on data protection, competition, consumer protection and labour law, and comments on the uncertainties and lacunae produced therein. It concludes with the acute question of whether fresh EU regulation would be necessary to avoid fragmentation or, on the contrary, if such regulation would create unnecessary burdens and stifle innovation. Taking a broad perspective and pragmatic view, the book provides a comprehensive overview of the collaborative economy in the context of the EU legal landscape.

The Sharing Economy - Arun Sundararajan 2017-04-21

“An insightful guide to the forces shaping our economy” that explores the far-ranging implications of the shift to crowd-based capitalism—with case studies on Uber, Airbnb, and others (Hal Varian, Chief Economist at Google) Sharing isn’t new. Giving someone a ride, having a guest in your spare room, running errands for someone, participating in a supper club—these are not revolutionary concepts. What is new, in the “sharing economy,” is that you are not helping a friend for free; you are providing these services to a stranger for money. In this book, Arun Sundararajan, an expert on the sharing economy, explains the transition to what he describes as “crowd-based capitalism”—a new way of organizing economic activity that may supplant the traditional corporate-centered model. As peer-to-peer commercial exchange blurs the lines between the personal and the professional, how will the economy, government regulation, what it means to have a job, and our social fabric be affected? Drawing on extensive research and numerous real-world examples—including Airbnb, Lyft, Uber, Etsy, TaskRabbit, France’s BlaBlaCar, China’s Didi Kuaidi, and India’s Ola, Sundararajan explains the basics of crowd-based capitalism. He describes the intriguing mix of “gift” and “market” in its transactions, demystifies emerging blockchain technologies, and clarifies the dizzying array of emerging on-demand platforms. He considers how this new paradigm changes economic growth and the future of work. Will we live in a world of empowered entrepreneurs who enjoy professional flexibility and independence? Or will we become disenfranchised digital laborers scurrying between platforms in search of the next wedge of piecework? Sundararajan highlights the important policy choices and suggests possible new directions for self-regulatory organizations, labor law, and funding our social safety net.

Essentials of Organizational Behavior - Terri A. Scandura 2017-12-13

Concise, practical, and based on the best available research, *Essentials of Organizational Behavior: An Evidence-Based Approach*, Second Edition equips students with the necessary skills to become effective leaders and managers. Author Terri A. Scandura uses an evidence-based approach to introduce students to new models proven to enhance the well-being, motivation, and productivity of people in the work place. Experiential exercises, self-assessments, and a variety of real-world cases and examples provide students with ample opportunity to apply OB concepts and hone their critical thinking abilities. New to this Edition A new Emotions and Moods chapter delves into important topics like emotional intelligence, emotional contagion, and affective neuroscience. A new Power and Politics chapter unpacks the most effective influence strategies and helps students develop their political skills. A streamlined table of contents now combines perception and decision making in a single chapter and change and stress in a single chapter. New case studies, including some from SAGE Business Cases for the Interactive eBook, on topics such as virtual teams, equal pay and the gender wage gap, and the use of apps at work introduce timely and relevant discussions to help foster student engagement. The new edition has been rigorously updated with the latest research throughout and includes expanded coverage of Machiavellian leadership, ethical decision making, and organizational design through change. New Best Practices and Research in Action boxes as well as new Toolkit Activities and Self-Assessments have been added to make the text even more hands-on and practical.

Special Issue - Austin Sarat 2016-02-17

This volume carefully examines the relationship between gender, equality, and power across an array of

realms: sex, reproduction, pleasure, work, money. It identifies social, political, economic, developmental, and psychological and somatic forces, operating both internally and externally, that complicate the expression and constraint of power.

Shaping the Corporate Landscape - Nina Boeger 2018-02-22

Currently, there exists a distrust of corporate activity in the continuing aftermath of the financial crisis and with increasing recognition of the threats of climate change and global, as well as national, inequalities. Despite efforts in the arena of corporate governance to address these, we are still beset with corporate scandals and witness companies facing large fines for their environmental and cost-cutting misdemeanours. Recognising that the usual responses to dealing with these corporate problems are not effective, this book asks whether the traditional form of the joint stock corporation itself lies at the heart of these problems. What are the features of the corporate form and how does its current regulation underscore these problems? Identifying such features provides a basis for the discussion to develop towards suggesting more progressive regulatory developments around the corporate form. More fundamentally, this book investigates a diverse range of corporate governance models that are emerging as alternatives to the shareholder corporation, including employee-owned, cooperative and social enterprises. The contributors are leading scholars from various backgrounds including law, management and organisation studies, finance and accounting, as well as experienced professionals and policy makers with expertise in social and cooperative business models and the role of employees in the corporation.

Competition Policy and Patent Law under Uncertainty - Geoffrey A. Manne 2011-06-13

The regulation of innovation and the optimal design of legal institutions in an environment of uncertainty are two of the most important policy challenges of the twenty-first century. Innovation is critical to economic growth. Regulatory design decisions and, in particular, competition policy and intellectual property regimes can have profound consequences for economic growth. However, remarkably little is known about the relationship between innovation, competition and regulatory policy. Any legal regime must attempt to assess the trade-offs associated with rules that will affect incentives to innovate, allocative efficiency, competition, and freedom of economic actors to commercialize the fruits of their innovative labors. The essays in this book approach this critical set of problems from an economic perspective, relying on the tools of microeconomics, quantitative analysis and comparative institutional analysis to explore and begin to provide answers to the myriad challenges facing policymakers.

The Handbook of Diverse Economies - J.K. Gibson-Graham 2020-02-28

Economic diversity abounds in a more-than-capitalist world, from worker-recuperated cooperatives and anti-mafia social enterprises to caring labour and the work of Earth Others, from fair trade and social procurement to community land trusts, free universities and Islamic finance. *The Handbook of Diverse Economies* presents research that inventories economic difference as a prelude to building ethical ways of living on our dangerously degraded planet. With contributing authors from twenty countries, it presents new thinking around subjectivity and methodology as strategies for making other worlds possible.

Urban Food Sharing - Davies, Anna 2019-04-17

Available Open Access under CC-BY-NC licence. This book explores the history and current practice of food sharing. Illustrated by rich case studies from around the world, the book uses new empirical data to set an agenda for research and action. The book will be an important resource for researchers, policy makers and sharing innovators to explore the impacts and sustainability potential of such sharing for cities.

A Research Agenda for Sustainable Consumption Governance - Oksana Mont

p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 10.0px Arial} Evaluating achievements, challenges and future avenues for research, this book explores how new dimensions of knowledge and practice contest, reshape and advance traditional understandings of sustainable consumption governance.

Collaborative Capitalism in American Cities - Rashmi Dyal-Chand 2018-05-10

In many American cities, the urban cores still suffer. Poverty and unemployment remain endemic, despite policy initiatives aimed at systemic solutions. Rashmi Dyal-Chand’s research has focused on how businesses in some urban cores are succeeding despite the challenges. Using three examples of urban collaborative capitalism, this book extrapolates a set of lessons about sharing. It argues that sharing can fuel business development and growth. Sharing among businesses can be critical for their economic survival. Sharing

can also produce a particularly stable form of economic growth by giving economic stability to employees. As the examples in this book show, sharing can allow American businesses to remain competitive while returning more wealth to their workers, and this more collaborative approach can help solve the problems of urban underdevelopment and poverty.

Perspectives on the Sharing Economy - Indre Maurer 2019-08-15

Sharing instead of owning is one of the major trends in modern (business) life. By changing how people consume, the rise of the sharing economy has the potential to redefine the role of owners, consumers and producers, change their mode of transaction, create innovative business models, disrupt existing industries, and challenge political and regulative institutions. In addition to these practical implications, the sharing economy phenomenon represents a novel playground for theoretical advancement, attracting a multitude of research and researchers from different disciplines. While this can potentially open up new avenues for practice and theory to stimulate each other, they do not seem to go hand-in-hand at the moment. This volume brings together research from a wide variety of theoretical backgrounds and disciplines to encourage academic discourse on the sharing economy phenomenon. It comprises contributions that are grounded in different theoretical perspectives, including business history, economics, strategic management, organization studies, information systems, political science, legal studies, linguistics, and semantics. While all contributions focus on the sharing economy phenomenon, they examine the subject from different disciplinary angles. Together, they provide a coherent and comprehensive overview of research on the sharing economy.

Law and the Precarious Home - Helen Carr 2018-05-17

This book explores the emergent and internationally widespread phenomenon of precariousness, specifically in relation to the home. It maps the complex reality of the insecure home by examining the many ways in which precariousness is manifested in legal and social change across a number of otherwise very different jurisdictions. By applying innovative work done by socio-legal scholars in other fields such as labour law and welfare law to the home, *Law and the Precarious Home* offers a broader theoretical understanding of contemporary 'precarisation' of law and society. It will enable reflections upon differential experience of home dependent upon class, race and gender from a range of local, national and cross-national perspectives. Finally it will explore the pluralisation of ideas of home in subjective experience, social reality and legal form. The answers offered in this book reflect the expertise and standing of the assembled authors who are international leaders in their field, with decades of first-hand practical and intellectual engagement with the area.

Assembling Neoliberalism - Vaughan Higgins 2017-04-06

This book examines how neoliberalism is constituted from multiple, diverse elements; how these elements are brought together and made to cohere; and the challenges, contestations, and consequences of such. Informed by assemblage thinking, the collection builds on research that emphasizes the forms of experimentation, adaptation, and mutation through which neoliberalism is enacted and rendered workable across different spaces. Contributors provide original case studies on topics such as democratic administration, carbon markets, the sharing economy, behavioral economics, disease management, free trade, and youth volunteering. They interrogate the forms of expertise through which neoliberalism is rendered knowable; the diverse socio-technical practices that make neoliberalism governable; and the practices, effects, and tensions involved in the assembling of neoliberal subjects.

The Food Sharing Revolution - Michael S. Carolan 2018-11-15

In *The Food Sharing Revolution*, Michael Carolan tells the stories of entrepreneurs who are bucking the corporate food system. They are farmers like Josh, a co-op dairyman who doesn't own his cows, but has a good income and a sense of autonomy. They are business owners like Dorothy, who opened her bakery with the help of a no-interest crowd-sourced loan. They are chefs like Camilla, who introduces diners to her native Colombian cuisine through peer-to-peer meal sharing. Each is making the most of the sharing economy, while avoiding the pitfalls of Uber and Airbnb. Their success is not only good for aspiring producers, but for everyone who wants a healthier, more sustainable, and more ethical way to eat.

Minnesota Law Review - 2016

Legal Scholarship for the Urban Core - Peter Enrich 2019-07-11

Provides compelling examples of engaged legal scholarship addressing issues of entrenched poverty and underdevelopment in American urban cores.

Emerging Issues in Islamic Finance Law and Practice in Malaysia - Umar A. Oseni 2019-08-26

Through a thorough analysis of emerging legal and regulatory issues in Islamic finance law and practice in Malaysia, this exciting new study covers issues such as blockchain technology, anti-money laundering, and FinTech in Islamic finance.

The Sharing Economy for Tackling Cybercrime - Ethem Ilbiz 2023-02-02

This book explains Europol's online sharing platforms efforts in three major cybercrime areas: ransomware, money laundering with cryptocurrencies, and online child sexual exploitation that Europol has already pushed private and public actors to cooperate. Since the global financial crisis, online sharing economy platforms have made a significant impact on use of under-utilized resources. People who have a car (Uber) or a spare room (Airbnb) began to share their under-used assets with others for extra income. The success achieved by these online platforms that enable efficient use of limited resources raised a new discussion on whether a similar governance model can be implemented by public administrations where public resources are insufficient. Cybercrime is one of these fields where most law enforcement agencies have not got enough resources to tackle these crimes. They need the human and technical resources of the private sector for a safer society. This book, for the first time, seeks the answers to this question. It examines the feasibility of online sharing economy platforms to enhance public-private partnerships to tackle cybercrime. The European Union Policing Agency, Europol, is the first police organization to adopt a similar model to interact with policing agencies and private industry. Drawing on extensive research, the book offers crucial insights for policymakers, researchers, and the public interested in new trends in sharing economy, innovative governance models, public-private partnerships, and cybercrime investigations.

Nordic labour markets and the sharing economy - Jon Erik Dølvik 2018-02-19

This report presents a preliminary knowledge status about implications of the sharing economy for labour markets and employment relations in the Nordic countries. It also reviews how the Nordic countries and their social partners approach the sharing economy and issues relating, amongst other, to its legality, regulation, taxation, and terms of competition. There is so far scant supply of statistics, data and research in this field. The employment potentials and consequences of the sharing economy will, amongst other, depend on the governments' and the organized actors' responses to these challenges. Currently, all the actors seem to be in a phase of knowledge gathering and deliberation of possible policy options, cautiously avoiding taking steps that might obstruct the development of the sharing economy.

The SAGE Encyclopedia of Food Issues - Ken Albala 2015-05-08

The SAGE Encyclopedia of Food Issues explores the topic of food across multiple disciplines within the social sciences and related areas including business, consumerism, marketing, and environmentalism. In contrast to the existing reference works on the topic of food that tend to fall into the categories of cultural perspectives, this carefully balanced academic encyclopedia focuses on social and policy aspects of food production, safety, regulation, labeling, marketing, distribution, and consumption. A sampling of general topic areas covered includes Agriculture, Labor, Food Processing, Marketing and Advertising, Trade and Distribution, Retail and Shopping, Consumption, Food Ideologies, Food in Popular Media, Food Safety, Environment, Health, Government Policy, and Hunger and Poverty. This encyclopedia introduces students to the fascinating, and at times contentious, and ever-so-vital field involving food issues. Key Features: Contains approximately 500 signed entries concluding with cross-references and suggestions for further readings Organized A-to-Z with a thematic "Reader's Guide" in the front matter grouping related entries by general topic area Provides a Resource Guide and a detailed and comprehensive Index along with robust search-and-browse functionality in the electronic edition This three-volume reference work will serve as a general, non-technical resource for students and researchers who seek to better understand the topic of food and the issues surrounding it.

Property Law - Joseph William Singer 2017-03-20

This hugely successful cases-and-problems book is acclaimed for its textual clarity, evenhanded perspective, and contemporary, up-to-date character. Easily distinguished from other property casebooks

for its clear descriptions of legal doctrine and its variations; its explanations of the social ramifications of property law; its emphasis on both statutory and regulatory interpretation; its comprehensive treatment of public accommodations and fair housing law, current tribal property issues, and property in human bodies; and its use of the problem method to teach legal reasoning and lawyering skills. Thoroughly updated to reflect significant changes in the law of property, the Seventh Edition incorporates multiple new Supreme Court cases, including: Texas Department of Housing & Community Affairs v. Inclusive Communities Project, Inc., Obergefell v. Hodges, and Reed v. Town of Gilbert, and three decided or pending cases with implications for regulatory takings, Horne v. Dep't of Agriculture, Marvin M. Brandt Revocable Trust v. United States, and Murr v. State.

Play Among Books - Miro Roman 2021-12-06

How does coding change the way we think about architecture? This question opens up an important research perspective. In this book, Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information. They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an "infinite flow" of real books. Focusing on the intersection of information technology and architectural formulation, the authors create an evolving intellectual reflection on digital architecture and computer science.

Collaborative Governance - Stephen Greenwood 2021-05-10

Traditional governance, even when it is functioning effectively and fairly, often produces clear winners and clear losers, leaving smoldering resentments that flare up whenever there is a shift in the balance of power. Over the past two and a half decades, a new style of governance has arisen to disrupt some of that winner-takes-all dynamic, offering parties a means to collectively navigate their interests in a highly focused and democratic way. Collaborative Governance is the first comprehensive practice-based textbook on the topic, presenting a solid grounding in relevant theory while also focusing on case studies, process design, and practical tools. Bringing together theory and tools from the fields of negotiation and mediation, as well as political science and public administration, this book introduces students and practitioners to the theory of collaborative governance in the context of practical applications. Coverage includes: • A connection of the practices of collaborative governance with the field's theoretical underpinnings; • Tools for students and practitioners of collaborative governance—as well as public administrators and other possible participants in collaborative governance processes—to discern when collaborative governance is appropriate in politically complex, real-world settings; • A roadmap for students, practitioners, and process participants to help them design—and effectively participate in—productive, efficient, and fair collaborative governance

processes; • An exploration of constitutional democracy and the ways in which collaborative governance can be used as a tool in building a more just, fair, and functional society. Collaborative Governance is an ideal primary textbook in public administration, planning, and political science courses, as well as a jargon-free primer for professionals looking to learn more about the theory and practice of this important field.

The Handbook of Law and Society - Austin Sarat 2015-03-30

Bringing a timely synthesis to the field, The Handbook of Law and Society presents a comprehensive overview of key research findings, theoretical developments, and methodological controversies in the field of law and society. Provides illuminating insights into societal issues that pose ongoing real-world legal problems. Offers accessible, succinct overviews with in-depth coverage of each topic, including its evolution, current state, and directions for future research. Addresses a wide range of emergent topics in law and society and revisits perennial questions about law in a global world including the widening gap between codified laws and "law in action", problems in the implementation of legal decisions, law's constitutive role in shaping society, the importance of law in everyday life, ways legal institutions both embrace and resist change, the impact of new media and technologies on law, intersections of law and identity, law's relationship to social consensus and conflict, and many more. Features contributions from 38 international expert scholars working in diverse fields at the intersections of legal studies and social sciences. Unique in its contributions to this rapidly expanding and important new multi-disciplinary field of study.

The Sharing Economy in Europe - Vida Česnuitytė 2022-01-22

This open access book considers the development of the sharing and collaborative economy with a European focus, mapping across economic sectors, and country-specific case studies. It looks at the roles the sharing economy plays in sharing and redistribution of goods and services across the population in order to maximise their functionality, monetary exchange, and other aspects important to societies. It also looks at the place of the sharing economy among various policies and how the contexts of public policies, legislation, digital platforms, and other infrastructure interrelate with the development and function of the sharing economy. The book will help in understanding the future (sharing) economy models as well as to contribute in solving questions of better access to resources and sustainable innovation in the context of degrowth and growing inequalities within and between societies. It will also provide a useful source for solutions to the big challenges of our times such as climate change, the loss of biodiversity, and recently the coronavirus disease pandemic (COVID-19). This book will be of interest to academics and students in economics and business, organisational studies, sociology, media and communication and computer science.
